

### Nearly 300 at Rally At St. Andrew's Church

A successful Rally Day at each September marks the beginning of the new Sunday school year when students, teachers and staff workers attended was held at the St. Andrew's Episcopal Church Sunday Rally Day.

As in public schools, registration and greater attendance than ever are anticipated this year, according to Rev. Hugo R. Percy, rector of the church.

UNDER THE direction of Father Percy and Mrs. Jessica Jelf, director of religious education, an adequate and competent staff of more than 40 teachers and helpers has been recruited and trained.

Teacher training meetings will continue throughout the fall and winter beginning Oct. 7. The classes will be held on the first Tuesday of each month at the parish hall beginning at 7:30 p.m. Father Percy will conduct classes on "Preparation of the Teacher," "Preparation of the Lesson," and "Presentation of the Lesson." The classes will be open to all who may wish to attend.

REGISTRATION for Sunday school will continue each Sun.

### 'Letting Go' To Be Topic Of Sermon

Let go—and let God. How many times we have heard these words! How many times we have said, "Yes, that is very good advice."

But many of us upon second thought have wondered, "Just how do I let go and let God?"

This coming Sunday, at the 11 a.m. services of the Redondo-Torrance Church of Religious Science, Dr. Earl D. Barum will explore some techniques for "letting go" and thereby becoming aware of a greater consciousness of unfoldment and growth spiritually.

At the 9:15 a.m. services, a special service of installation for all teachers and helpers will be held next Sunday during the morning services.

## WHAT'S DOING

These days there's no telling where you'll find transistors, those mighty mites developed by phone people. They've been whirling through space inside U.S. satellites, helping to radio information back to earth. And down here, they're helping to bring you good phone service. The special transistor held by the phone man above, for instance, helps speed out-of-town calls. For it automatically picks the fastest voice paths to the town you're calling. On top of that, it enables more and more folks to dial their own long distance calls. Transistors are among a whole host of tiny, space-saving parts we use to bring better service to you.

An explosion — an auto accident — a robbery — a blazing house — an attempted suicide — perhaps a murder. Each one of these situations is an emergency, a real emergency. The police, the fire department, the sheriff's office, or an ambulance are required immediately. The first question asked is — How can I get help? The answer is the closest telephone and the number to dial is "116". By dialing 116, the caller is assured of reaching an operator within a matter of seconds. She will help make a prompt connection to the emergency service you asked for — if your call is an emergency. Be sure you give her sufficient information, such as — I want to report a "Fire," or I want a "Policeman," or I want an "Ambulance," or I want the "Sheriff," or "Highway Patrol." Then give the address and name of the city or town where the emergency exists. Everyday more than 1500 calls are placed with the "116" operator in the L. A. area.
