## Gas Firms Apply For New Out-of-State Pipeline

Application to construct a fourth separate natural gas pipeline to bring out-of-state supplies into the Los Angeles area, at a cost of over \$44 million, was filed with the Public Utilities Commission by Southern California and Southern Counties Gas Companies.

The proposed artery, which would have the ultimate capacity to bring over 800 million cubic feet of gas a day into the Southern California area, would tap new sources of supply for Southland use. Southern California Gas Company Division Manager C. W. Shippy stated that the additional supplies would not only ensure the companies' ability to meet the needs of domestic customers for many years to come, but would also make available large additional quantities of gas for industrial users, including those to meet the requirements and necessities of the Air Pollution Control District in the Los Angeles Basin.

Integration of this line with the companies' three out-of-state facilities would bring to almost two billion cubic feet the amount of out-of-state gas that could be delivered into Southern California every day.

Construction would begin immediately upon certification, gas company officials indicated, with the hope that opera-
