A3D "SKYWARRIOR"

KNOW YOUR N

cent of the cases, has centered in the Southern states, while the rate in California has remained less than 0.2 cases per 100,000 population. Los Angeles County, however, has been relatively free of the disease. In 1958 there were three cases, one of which resulted in death. Only one case was reported during 1959.

DIPTHERIA

les County, however, has been relatively free of the disease. In 1958 there were three cases, one of which resulted in death. Only one case was reported during 1959.

DIPTHERIA is not the dreaded disease that it was many years ago, but it is still considered most dangerous. Even with the best of modern medical care, the case fatality rate is 6 to 7 per cent. medical care, the case fatality rate is 6 to 7 per cent. Although this disorder is rel-

atively preventable, there are a number of reasons why it has not become as rare as cer-

BECAUSE the disease tends to have its highest fatality rate among very young children, immunization against it should

be given as early as possible. An ideal program is a series of

An ideal program is a series of three injections spaced a three injections spaced at the age of one month. With the use of a combined injection known as DPT this series after the combined injection where the combined injection where the combined in the combined injection where the combined in the comb

fords protection not only against diptheria but against whooping cough and tetanus as

well.

A booster dose is recommended at 3 to 4 years of age, and about every five years thereafter. The protection, of course, can be started at any time regardless of the age of the child or adult.

IN VIEW of the forecast that

diptheria cases may increase in 1960, the immediate protec-tion of any child who has not yet received a complete series of injections, or who may be in need of a booster dose, is
