German Measles Are Not Really Measles and Not Really German measles or scarlet lever of a combination of both, appear first on the face and usually cover the body within 24

By ROY O. GILBERT (County Health Officer)
German measles (rubella) is 200 years ago and also because a highly contagious and curiously misnamed disease that that of its more infectious and is not a German export.
Nevertheless, because the not usually considered serious persons most often infected,

Ry ROY O. GILBERT (County Health Officer)
by a German physician over first few months of pregnancy.
Widespread throughout the and other groups of young peothe rash sometimes resembles world, the occurrence of ruthat of its more infectious and bella is greater during winter risk of infection is probably a slight elevation in temperature.

This acute and usually cover the body girls within 24 bours. The first on the face and usually cover the body girls hours. The fymph glands back of the ear may become ena highly contagious and curithat of its more infectious and bella is greater during winter risk of infection is probably a slight elevation in temperature.

This acute and most contagious stage of the infection last about three days
agent is transmitted from one

DRIVEN

WITHOUT

A BATTERY!

L.A.TO PHOENIX

PL. 3-1411

On Monday, January 9 driver Mary Davis, in a

the freeways and desert highways to prove that the alternator does not rely on the battery nearly so much

The Plymouth alternator test was sanctioned by the United States Auto Club. A USAC official was a pas-

senger with Miss Davis from start to finish, certifying

that the Plymouth drove 394 miles without a battery.

What this can mean to you You must have a battery even in a Plymouth. But the alternator relies on it less -delivers current even when the engine is idling! That

means fewer stalls, surer starts, longer battery life. The alter-

nator is standard equipment at no extra cost on every 1961 Plymouth and Valiant. See your Plymouth-Valiant

dealer for a demonstration this week!

as the conventional generator used in other cars.

1961 alternator-equipped Plymouth from which the battery had been removed, took to Public Notice
