#### **Utilize Space** In Small Home

In Small Home
Budget-conscious young married couples are discovering that they can have a low-cost home with small rooms that don't appear boxed in.

The answer is in design. Exposed beam and ceiling design in wood, with divider walls seperating various use areas, eliminates the cooped up feeling in the small room.

Wide open spaces above the divider walls give the small rooms a feeling of more spaciousness. This is especially true if light colored woods, like Douglas fir or west coast hemlock, are used for the exposed ceiling boards and it is finished with clear lacquer.
