### "Your Mother Has Real Problem..."

Dear Ann Landers: I'm a normal boy of 17 who would like to take out a girl. I'm not sweet on any special chick but there are several cute ones at school I'd like to ask for a date. The problem is my mother.

She says a boy 17 (I'll be 18 in December) should not be thinking about girls, and if she catches me talking to a girl on the phone or sitting in a girl's house after school, she'll knock my block off.

Mom checks on me when I say I'm going over to a guy's house. She calls up to ask me some dumb question. When I tell her I'm going to the library after school I find her sitting there "accidentally." The guys all know about this and the ribbing is murder.

Can you give me some help with my problem?—TAILED

Dear Tailed: It's your mother who has the real problem. A boy almost 18 who wants to date should be allowed to do so. Mothers who are too possessive sometimes need professional help. Show her this column and if she has any questions she'd like to ask me I'd be happy to oblige.

Dear Ann Landers: Why would a man profess his undying devotion to a woman, promise her marriage "when he is financially able" and at the same time buy her expensive gifts, see her only on Mondays, Wednesdays and Fridays, never introduce her to his business associates or friends, and ask her not to phone him at home because his mother is very nervous and the telephone bothers her?

I worship this man and because of him I have cut myself off from all other male contacts for the last three years. These questions plague me. Can you provide answers?—BLIND LOVE

Dear Blind: I can't provide answers, but I can hazard a guess or two. This man is very much married and his "mother" who can't stand to hear the telephone ring is really his wife. Or — he's a mama's boy and is actually afraid to let his mother know he's interested in a woman.

In either case, the relationship doesn't stand the chance of a snowflake in New Orleans. Knock it off.

Dear Ann Landers: I run a high-class rooming house for working girls. I don't rent to just anybody.

A certain young woman who is 24 moved in about six months ago. She came from a small town and looked like Elsie Dinsome — no make-up, hair the color God gave her and she carried her belongings in a suitcase with leather straps around it.

She got herself an office job the second day in town and two months later she went blonde and learned to paint up and took on a second job modeling. I see her leave with a hatbox around dinner time and often she doesn't come home until it's light outside.

It's unhealthy for a young girl to work so many hours. I think she should give up one job or the other. Should I write to her mother and tell her what kind of hours her daughter is keeping? I always take the mothers' addresses in case of emergency.
