

North High Set for Seventh Homecoming

Miss Sandy Rayes, daughter of Mr. and Mrs. Rudolph Rayes, 4302 W. 177th St., chosen as North High's 1961 Homecoming Queen, will be crowned Friday at the North High vs. Redondo football game during halftime, and will reign over the seventh annual Homecoming Dance to be held in the cafeteria following the game.

The four princesses in the Queen's court are Melissa Mahteny, senior, daughter of Mr. and Mrs. Howard Minnig,

17121 Wilton Place; Carol Diane Robinson, senior, daughter of Mr. and Mrs. Herbert D. Robinson, 18915 Cerise; Sue Rogers, senior, daughter of Mr. and Mrs. Tone Rogers, 2102 W. 160th St.; and Judy Taylor, junior, the daughter of Mr. and Mrs. David Taylor, 3735 W. 182nd St.

ACTIVITIES planned for Friday include a pep rally in the gymnasium at snack, and the North High vs. Redondo foot-

ball game held at North High at 8 p.m. During the halftime, floats from the four classes will parade around the field and judges will select the best entry.

"America, the Melting Pot of the World" will be the theme of the senior class float, "Tropics" will be the theme for the junior class float, the sophomore class' theme will be "Flying Carpet," and the freshman class float will be called "Shangri-La."

THE QUEEN and her court will be crowned after the judging of the floats.

"Around the World Tonight" is the theme of the Homecoming dance Friday from 10 to 12 p.m. Highlighting the dance will be the queen's waltz, "A Pretty Girl Is Like a Melody," sung by senior Janet Perry.

The Avalons, an orchestra from El Camino College, will provide music during the dance.

THE DRESS for the dance is

semi-formal and the price is 50 cents for North High students and 75 cents for alumni.

A peanut race was held Tuesday on the quad in which two members from the Cee, Bee, junior, and varsity teams participated.

Thursday, the top 15 girls, accompanied by their mothers, attended a Homecoming tea after school.

"Hats off to the American farmer—for in no phase of the cold war does America have greater superiority over Communism than in agriculture."—Elwyn Guest, Angola (N.Y.) Evans Journal.

Art Collection On Display at Marymount PV

Three famous paintings from the art collection of Alfred S. Karlson of Beverly Hills are now on display at Marymount College.

Two are by El Greco—"St. John the Baptist" and "St. Francis of Assisi"—and the third is Bellini's "The Madonna and Child."

The art treasures are now on view in the college library on the Palos Verdes Estates campus. There is no admission charge.

Know Your Traffic Laws

Prepared in Cooperation With the Torrance Police Department

Traffic Box Score (As of August 1)*

Fatalities	6
Injury Accidents	279
Persons Injured	329
Non-Injury Accidents	384

*Box score of all accidents investigated by Torrance Police Department since Jan. 1, 1961

Many times the driving public in any city questions the enforcement of traffic laws by the local police department. The public at times thinks the enforcement is too rigid with not nearly enough warnings given, too much importance attached to the so-called minor traffic violations, or too much time spent bothering the driving public instead of catching burglars and bank robbers.

In the city of Torrance, traffic enforcement is conducted on a selected enforcement basis. Selective enforcement is simply enforcement in areas or locations where the greater number of traffic accidents occur or where too many violations are occurring and the hazard is the greatest. In other words, there is nothing haphazard about where the traffic units and motorcycles are working. Rather they are at different locations for a specific purpose, working a particular type of accident-causing violation. This type of enforcement is aimed at those violations that are causing accidents and working in areas that need be worked on statistics obtained over the course of the year.

THERE IS no such thing as a minor traffic violation. They all are capable of killing or maiming. One has only to check traffic statistics to find out that many of our traffic fatalities were due to one of those so-called minor violations. One thing is certain, traffic enforcement is only one of many phases of police work covered by every police officer.

FIRST, every man on the department is a police officer sworn to protect life and property. This includes all facets of police work.

Secondly, he works his specific assignment. Certainly no traffic citation is more important than catching a bank robber or burglar. Rest assured that any time a bank is robbed, a burglar is breaking into a house or business, or any other such crime is committed you will find policemen from many

different type details at the scene ready to assist in any way they can.

PERHAPS YOU are wondering what selective enforcement has done in our own city. In 1960 Torrance showed a reduction in traffic accidents of about 21 per cent over the year of 1959. So far this year we are showing a reduction over 1960.

To show a reduction in accidents as we have, considering the growth of our city in recent years, tends to reflect the enforcement policies of the police department, showing they are good and are obtaining results. It also shows driving public is aware of the and by practical application, our drivers have assisted in reducing our accident rate.

WHEN ANY city is able to show a reduction in accidents in this day and age, particularly anywhere in Southern California, this shows that a determined effort between the driving public and the police department can and will produce good results.

Your police department stands ready to help and assist you in any way it may be called upon to serve you. This police department or any other police department is as good as the public makes it. No police department can properly function or be effective without the aid and help of the general public.

611 years of labor — In the year 1350, a skilled laborer paid eight days' labor (112 hours) for a bushel of wheat. Two hundred years later, his bushel of wheat cost only six days' (80 hours) work. In 1875, hard times prevailed and a bushel of wheat cost seven days' (98 hours) work. By 1905, wheat was costing only five days' (70 hours) work. By 1925, his 60 pounds of wheat was costing only two days' (20 hours) work. Today, he buys the same weight of better food for less than one hour's work.
