

A Look at Trousers On the First Lady

by Count Marco

It is a sad state of affairs when one can't tell from the rear whether it is the President or his wife one sees walking across the lawn at Hyannis Port.

It is indeed unfortunate that the First Lady of the land must resort to looking like the last female on earth in public.

It wouldn't surprise me in the least if I should run across a clothes line somewhere in the Executive Mansion with "His" and "Hers" pants hung up to dry.

While shaking up his Cabinet, the President should do a bit of shaking up of his wife, so that in the future she will not again appear in public in such ugly attire as I noticed on her just recently.

She wore a sloppy pull-over sweater and a wrinkled pair of Capris. On her feet were loose

sandals. Her hair looked as though it hadn't been combed in a week. Methinks she is over-doing this casual look.

One would think to look at her that she came from Los Angeles or Palm Springs instead of the cream of Eastern society.

Such costumes as Mrs. Kennedy wears much too often give the younger generation the wrong impression of what is correct attire. Too, they add nothing to the glory of the position formerly held in highest esteem by women the world over.

Indeed, there is a time and place for casualness. But casualness need not be confused with sloppiness. It is sloppy to wear pants, but it is casual to wear a simple cotton or knit.

Being First Lady of the land does not carry with it the privilege of being out of uniform whenever the mood strikes.

My advice to the President of this fine country is that he should immediately burn his wife's slacks, pants and sloppy sweaters. He should also insist that she run a comb through her hair at least once a day, particularly before appearing in public.

To be a president's wife is a most honorable position. To be a wife and mother is even more so. To desecrate both is absolutely inexcusable.

Saxon Band and Choir To Present PTA Program

North High School's Saxon band and choir will present a Christmas program for the PTA in the cafeteria, Wednesday.

The hour-long concert will begin at 7:30 p.m.

Parents and friends of North High are cordially invited to attend the Christmas

program. Our fine music department has always presented an enjoyable evening for audiences. Mrs. Harvey R. Johnson, president of the PTA, stated.

THE BAND, directed by Robert L. Jones, will play such seasonal selections as "Frosty

the Snowman," "Sleigh Ride," "Winter Wonderland," "Jingle Bell Rhapsody," "Christmas Festival," and "White Christmas."

Frank W. Small will direct the Saxon choir, accompanied by senior Rachel Fillon.

THE CHOIR will sing tradi-

tional Christmas songs, including "Gloria Excelsis Deo," "Wonder! Wonder!" a Polish folk carol; "Lo, How a Rose E'er Blooming," "Companions, All Sing Loudly," a Basque carol; and "Once for Us a Child Was Born." Among the lighter tunes will be "Deck the Hut With Coconut" and "Now It is Christmas Time."

PREDICTION:

By 1971, electricity will be serving you twice as many ways as it does today

A library of computer tapes will "read" books to you. Food for a month will be prepared, stored in an electric cooker-freezer, and served automatically. You will clean your clothes right in the closet with an ultrasonic dry-cleaner. Entire walls will glow with electroluminescent lighting in colors which can be changed to create different moods.

Science is developing new sources of electricity

American industry recognizes that the future is all-electric. That is why today, more than ever before, practically all segments of industry are channeling

tremendous efforts toward finding new ways to produce, deliver and use electricity.

The electric industry, of course, continues to lead in this research. And logically so. Electricity is our business. We can produce it from a variety of sources.

Whatever the source, electrical energy is limitless, and Southern California Edison will continue to bring you an abundant, dependable supply at the lowest possible rates.
