'Age Is More Than a Number...'

Dear Ann Landers: Ho: old does a boy have to be before he can move out of his parents' home? Please answer this in the paper. I am sure there are many boys who would like to know the answer to this question.—SICK OF THE FAM-

P.S.: Please don't give a P.S.: Please don't give a long-winded lecture on how we should stay at home as long as possible because we are better off at home than we think. Thank you.

Dear Thank You: The age when a boy reaches his majority varies according to

jority varies according to the state. Any public library has this information. I am not going to give you a long-winded lecture, but I'd

a long-winded lecture, but I'd like to remind you that age is more than just a number, Bub. For example, some fel-lows at 16 could and should have moved out of their par-ents' home six months ago. Others, at 20, ought to stay home and grow up before they take on the outside

world.

And this may come as a surprise to you, but I'm not unequivocally opposed to young fellows leaving home. In special cases where there is brutality, or excessive domination, it may be best to shove off. If, however, the big beef is "I don't get enough freedom," it may be wise to take another look and wise to take another look and invite an unbiased fourth party to decide just how much freedom is "enough."

Dear Ann Landers: I am a 15-year-old girl who has been reading your column for two years. This problem may sound ridiculous to you but it worries me and I need

help.
There are times when I cry
for no reason at all. I know
it's natural to cry during a
sad movie, or when someone
hurts your feelings, but I
break into tears over nothing

break into tears over notning.

I worry a lot about things that most people don't even care about, such as the world coming to an end or the starving kids in other countries, or animals and birds being cold at night.

What can I do about this?—M.J.

Dear M. J.: Most people worry more than other peo-

Dear M. J.: Most people worry more than other people think they do, You just KNOW more about your own worries than anyone else's. It's natural for a 15-year-old to be somewhat moody and cry now and then, but you seem more weepy than you ought to be. It may be just a phase you're going through, but within a year if the weeping is still triggered by small things, please see a doctor.

Dear Ann Landers: I'll be honest and get right to the point, I'm 46, not bad look-ing and married to a woman who is about as lively as a dead mackerel.
