WHAT'S DOING

R. S. Pyle, your Telephone Manager in Torrance

Built-ins are very popular with home-owners these days. To go along with this modern trend, telephone people have designed a new "panel phone." The unit, recess mounted, fits neatly in the wall. One modern feature is the concealed cord reel. It pulls the cord back into the panel when not in use.

The panel phone is just now going into production. And while it seems an especially suitable space-saver for apartments and motels, we expect many folks will find it a very attractive built-in convenience for their own homes.

Winning free worms is a nice day's work for some lucky fish at the Bell Telephone Laboratories. The fish are part of an interesting telephone study on sound waves. And the worms are their reward for learning to react properly to certain sound waves beamed through the water.

Observing these performing fish is one unusual way in which telephone scientists are studying the basic mysteries of sound and its effects. Whatever they discover may well lead to more advanced communications devices for you.

Election day, November 6, is still a few weeks off. But it's not too early to make plans so you'll be sure to get to the polls. If you need transportation, now's the time to arrange with your friends for a ride. If small children keep you close to home, perhaps you can swap baby-sitting chores with a neighbor.

You can make these arrangements by phone... but that's not why I mention them. I just want to remind you that every vote is important. Be sure you cast yours November 6.
