BY REYNOLDS KNIGHT

The recent war scare over the Cuban situation made not only the citizenry nervous; it generated frenzied concern in the ranks of retailers who sell food, medicines, and related essential products.

What happened was a spate of "scare buying" by consumers who learned from the head lines of the critical international situation, then rushed to stock up. Tons of canned goods, coffee, sugar and otheer staples were snatched off supermarket shelves.

Robert C. Kirkwood, president of the F. W. Woolworth charmed the first of the F. W. Woolworth charmed the first of the F. W. Woolworth charmed the sale to stop fiddling with it and readjusting it to meet our changing needs—this system has done more to correct its deficiencies and right its wrongs than has any other wrongs than has any other prise system developed by man.

Actually, reports indicate that danger point extent that danger point extent that danger point extent that they'd best be prepared for recurrences.

FREE ENTERPRISE — A

goods, coffee, sugar and other er staples were snatched off supermarket shelves.

Retailers naturally like a surge in demand. But, they point out, there's a crucial inseparation of the human and institutions that make the principle of free enterprise really work. And it is true that this development has not been achieved without setbacks, without mistakes or institutions.

"BUT IT is clear that this system, perhaps still imperfect

nearly 50 years the depletion allowance written into the federal tax structure has been an incentive in the development of America's extractive indus-tries, including natural gas. But today this allowance, which recognizes the "wasting asset" nature of these industries, faces an attack aimed at the reduction or elimination of this tax provision.

Efforts to eliminate or re-

Efforts to eliminate or reduce this allowance are especially short-sighted now, according to W. G. Maguire, chairman and president of Panhandle Eastern Pipe Line Co., because they come just as the natural gas industry is faced with a probable rise in

IF ECONOMIC incentives are kept strong, Maguire asserted recently, "there is little concern over the industry's ability to meet market demand for 20 to 23 trillion cubic feet. in 1970, an increase of from seven to 10 trillion cubic feet over 1961 consumption."

Panhandle Eastern Pipe Line has long been a leader in development of the industrial market for natural gas and Maguire forsees "continued long-term growth prospects" in the industrial sector of the industrial sector of, the market. The residential mark-et for natural gas also will continue to grow, helped par-ticularly by the rising demand for home air-conditioning, he adds.

copies in 20 seconds—and it's priced to fit the pocketbooks of these prospective customers. Two models: \$39.95 and \$49.95.

TUNE BOOM - Resurgence TUNE BOOM — Resurgence is the word for the nation's musical instrument manufacturers. Quietly but effectively, leading companies in this \$500-million industry have streamlined production lines, coming up with jazzy promotion and advertising techniques to expand their markets. And it may be none too soon: imports have risen noticeably in recent have risen noticeably in recent years. Beryllium, one of the space-age metals, is now used in making some instruments.
And currently a promotional
