YOUR PROBLEMS
by Ann Landers

Ten Commandments, Still Best Rules...

Dear Ann Landers: I am sick of people who demand respect simply because they are older. Some old people are dumb and some young people are smart so why all this crummy advice about "honoring your father and mother?" My parents are so square you wouldn't believe it. Some of the things they think a 17-year-old kid should be doing are an absolute gas. My ma wants me to look at junk in museums. My old man thinks I ought to work up a sweat on the lawn. Why should I when we have a yard man who gets good money for loafing most of the time?

My parents haven't been teenager for 35 years so what do THEY know about it anyway? I'm sure you won't print this letter because I am right and you don't know how to answer it.—BILL

Dear Bill: The Ten Commandments are still the best rules to live by. No one has been able to improve on them in 5,000 years.

The Fifth Commandment says, "Honor your father and mother." In this sense, honor means respect. It didn't say, "Honor your father and mother if they are bright, or if you agree with them—or because they are older." It says honor them—and it suggests no reason except that they are your father and mother. And this is reason enough.

Dear Ann Landers: My sister is a nurse. She is married to a physician and they have three children. Every summer they come to visit us for two weeks. For the last three years they have managed to bring hearty Chicago-style germs to our Old Kentucky Home. Two weeks ago, as a result of their annual visit, we almost lost mother. She is still in the hospital with a staph infection and I am not feeling a bit well myself.

I have discussed this with our family doctor and he said it is possible for people to carry germs without being ill themselves. He also said he thinks perhaps the family illnesses were coincidental. Well, just how coincidental can you get? I don't want to take any more chances, coincidental or not. What do you suggest? —LOUISVILLE

Dear Louisville: Since you have persuaded yourself that your Chicago relatives are germy, you will probably get sick from just looking at them. So tell them they can't stay with you next year. Incidentally, MY medical
