It has happened—near.

New York to Philadelphia: San Diego to Los Angeles. 90 miles. That's the distance between a people still free and a free people betrayed into Communism. Do you find such geography alarming? Then think about this: The danger to our free institutions is as real and present as miles, or minutes of flying time. And you need not go to Cuba to strike a blow for freedom. Freedom needs defenders here, for the unfortunate paradox for Americans, the most powerful people on earth, is this: The freedoms we lose are the freedoms we give away. You must speak up for freedom now. Can you tell your children about the American Way? They'll be up to their necks in the fight for freedom soon; the Communists will see to that. Whether they win the fight depends upon how strongly they want to win, upon how strongly they believe in freedom.
