GET IN STRIDE GO CLASSIFIED

When is a fat wife not a fat wife? When her man likes her the way she is. If he enjoys patting your abundance gently now and then, smiling and happily saying, "That's my girl," then relax and stop crying in your soup and salad.

You American women have that women's magazine fever that keeps you at starvation point because the female writers insist you should look as gaunt as their models.

Your'e Not Too Fat Unless He Says So!

As comedian Mort Sahl once said of a girl who was too skinny, "Great model, but she'd never make it as a woman."

Don't pay any attention to those nonsensical publications. They're mostly compiled by females who either should be at home taking care of their own husbands or are completely unmanned and feeling pretty miserable about the whole thing.

They worry themselves into skin and bones competing feverishly with one another, and in their miserable state they want your company, so they keep hounding away at you about the "perfect figure."

Face up to it, girls. There is no such thing today as the esthetically perfect figure.

I'm not advocating obesity, mind you; everyone who can read English is familiar with my assault on the fatty fortress of the Fat Venus, and her reduction to lithe slenderness. No, I am talking about the few "extra" pounds that change you from a broomstick with a nervous tic to a soft, rounded article your man loves to hold.

Most husbands never noticeexcept approvingly-those pounds, so long as you keep them firmed and under control Being too thin only makes you nervous, and if there's one thing a husband can do without it's a skinny, nervous wife.

Next time that dear friend looks you up and down and smirks, "Darling, aren't you putting on a few pounds too many?", smile sweetly in return and say, "Not that my husband has noticed. When he does, then I'll do something about it."

However, it won't do any harm to test his eyesight now and then. Ask him if you're getting too fat. If he says, "Not that I notice," make him a nice dish of spaghetti and enjoy it with him.

But if he hedges or stammers or avoids answering entirely, get out the diet and exercise books;

it's fatter than you think.
