### LIFE'S LIKE THAT

By FRED NEHER

"This is my first garden . . . I'm trying a package of everything!"

# A Swiss bank sent us \$224,000 the other day.

You can judge a savings and loan association by the company it keeps. Take Great Western Savings.

Our list of customers reads like a Who's Who in the World of Finance: corporate treasurers and controllers, bankers, investment counselors, real estate brokers, and financiers.

But a most recent addition to our list, a Swiss bank, deserves special mention.

Of course, the first question that comes to mind is, "Why?" Why should a Swiss bank, an institution known the world over as a symbol of safety and stability, open a savings account with a Los Angeles savings and loan association?

There are three main reasons: Our high rate of interest, which is currently 4.8% a year. Our safety. And the availability of funds.

Now if you guessed that much, you may still be wondering why a Swiss bank should choose Great Western Savings from among the many associations available to them.

First, because of our reputation. It's international. We have savers in all 50 states and 70 foreign countries. (Banks in England, France and Belgium also have accounts with us.)

Then because of our size and strength. Our assets exceed \$600,000,000. And we're a member of the Great Western Financial Group, the first savings and loan organization ever to top one billion dollars in assets.

And because of our record. It's perfect. We've always answered withdrawal requests promptly. In full. Plus interest.

But even with all this, we still feel that the selection of Great Western Savings by a Swiss bank is an extraordinary vote of confidence. It's also a tribute to the convenience we provide.

Which brings up another point. If a Swiss bank finds it easy to send their money half-way around the world, wouldn't it be even easier to send yours half-way across town? We'll pay the postage. Both ways.
