HOW TO PUT 600 MILES IN A DAY—AND LOVE IT!

Simply start out in a Cadillac. For this is the one way you can spend from sunup to sundown at the wheel of a motor car and wish the day were longer. The 1964 Cadillac was bred to the road as no other fine car before it. A combination of engineering advancements, which only the Cadillac owner can experience, makes every Cadillac mile a pleasure. To begin with, there is the magnificent 340-horsepower V-8—the most powerful and efficient engine ever to enliven a Cadillac car. This is mated to a new Turbo Hydra-Matic transmission (or an improved Cadillac Hydra-Matic on some models) to produce both incredible smoothness and immediate response. Then there is the feather-light handling of this newest of all Cadillacs. A beautifully poised suspension system together with precise power steering permits a degree of controllability that is normally associated with cars half a Cadillac's size. Add to this the assurance of Cadillac's triple braking design—an exclusive safety benefit in this day of higher legal speeds and more crowded travel conditions. Finally, there is the restfulness of a true fine car ride—the extraordinary room and comfort and conveniences that let you sit back in complete relaxation while the miles melt away. Little wonder that Cadillac for 1964 is the most popular of all. Visit your authorized dealer to see why more people are selecting Cadillac than ever before. You won't need 600 miles to convince you. Just a few will do
