New Roadway Project Set

A roadway improvement project in the vicinity of the 213th Street-Dolores Street intersection was authorized this week by Supervisor Kenneth Hahn.

The project will consist of constructing curb on the north side of 213th street from Orrick Avenue to Dolores Street and on the west side of Dolores Street from 213th Street to Javelin Street.

In addition, a partial roadway cross-flow gutter will be constructed at the intersection and a 630 lineal foot section of the north side of 213th Street will be widened.

"The completed improvements will improve area drainage, increase traffic capacity, lower maintenance costs and generally add to the operational efficiency of these sections of County roadways," Hahn said.
