FIRST AID TIP

First aid care of poisonous snake bite is described by the Red Cross, which has been teaching first aid for 50 years. A person bitten by a poisonous snake should stop muscular activity at once. Tie a band firmly above the bite if it is on an arm or leg—lightly enough to prevent the return flow of blood into the surface vessels but not enough to shut off the deep-lying blood vessels. Sterilize a knife blade with a match flame and cut into the venom point. Avoid cutting muscles and nerves of the fingers, hand, or wrist lying just beneath the skin. Apply suction with mouth or suction cup. Rinse the fluid from the mouth, as it might have an ill effect on infected gums.

PUT A TIGER IN YOUR TANK!

"THE REAL STORY OF THE TORTOISE AND THE HARE..."

NEW POWER-FORMULA ENCO EXTRA GASOLINE BOOSTS POWER THREE WAYS:

- 1 Cleaning Power!** Dirt can clog even a new carburetor in a few months of normal operation—causing hard starting and rough idling. Your very first tankful of New Enco Extra will start to clear away these deposits—in new engines or old—to improve power and mileage.
- 2 Firing Power!** Spark plug and cylinder deposits can cause misfiring, pre-ignition and hot spots. New Enco Extra neutralizes these harmful deposits—to help your engine fire smoothly, to help preserve the power of new cars and restore lost power to many older cars.
- 3 Octane Power!** New Enco Extra has the high octane that most cars now need for full smooth performance without knocking. You'll get all these extras with New Power-formula Enco Extra gasoline—it puts a tiger in your tank!

Happy Motoring!
