CLOTHES PINUP
 Named "Clothes Pinup Queen" for 1952, Betty Tyler of Hollywood wears crown of laundry pins becoming. She was picked by a washing machine company to act as a glamorous reminder that today's housewife should maintain a smart appearance since modern appliances do so much housework automatically. To help lady look her best the Thor Corporation is giving away a well-stocked cosmetic kit with the purchase of a machine.

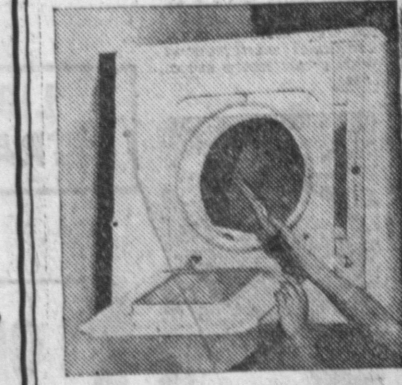

TIP FOR SPRINGTIME—Where to store blankets safely through the summer is a problem every housewife faces in the spring. Stored in closets or portable wardrobes, bulky blankets take a lot of room, often fall prey to moths. Here's a good solution. Put cleaned blankets in a new galvanized rubbish can and keep it in the attic or basement. A paper seal between the lid and the top of the can keeps out moths and dust. Quality ware, with durable galvanized coating, is inexpensive and will last for many years as a moisture- and rodent-proof storage container.

HINTS FOR HOMEMAKERS

YOUR DRYER NEEDS REGULAR CLEANING
 by the General Electric Consumers Institute

Like all other household appliances a clothes dryer needs regular cleaning if you expect it to give A-1 service. You'll find that vacuum cleaner will do a thorough job on the inside of the dryer—a job you should do at least once a month (or oftener, if excessive lint-producing fabrics have dried), according to the General Electric Consumers Institute.

Remove the lint catcher at the base of the dryer cabinet and clean it out, using vacuum cleaner suction. Then attach the flexible hose to the blower end of the cleaner and move the hose over the inside of the clothes basket, starting at the top and working down each side to blow lint down into the chamber.

The flexible hose attachment, working on the blower end of your vacuum cleaner, will remove lint effectively from the clothes basket of the dryer.

Put the hose on the suction end of the cleaner and after removing the bulk of the lint through the lint catcher opening with a long brush, insert the vacuum cleaner hose and get out the rest of the lint.

It's easy to lift the layer of lint off the screen of the lint catcher. Then clean the screen thoroughly with the crevice tool of the vacuum cleaner before replacing the lint catcher in the dryer cabinet.

Once in a while, you may want to wipe out the inside of the dryer clothes basket with a damp cloth, too, particularly if you've dried fuzzy, newly-tinted or heavily-starched fabrics.

As for the outer surface of the dryer, wiping with a clean damp cloth and an occasional waxing is about all it needs.
