another nice thing about an all-electric kitchen... it stays clean

Homemakers tell us that another thing they really like about electric kitchens is that electricity is the cleanest power known, as well as the most efficient. Take cooking, for instance—it's done with heat which is as clean as electric light.

It's a pleasure to work—if you can call the electric way work!—where colors stay bright, curtains stay fresh, walls and ceilings need decorating less often and pots and pans seldom need scouring.

You'll like an all-electric kitchen, too. And if you install it in planned stages, you can complete it with no strain at all on your budget. See your electric dealer.
