If you call by number

You'll have faster long distance service

You'll have faster long distance service if you give the operator the out-of-town telephone number you are calling, rather than just the name and address. That way, you see, you won't have to wait while she gets the number from "Information" in the distant town you're calling. You'll save time . . . and calling by number means better service for everyone, especially now when long distance lines are carrying so many important industrial and military calls.

a good way to save

on long distance calls is to tell the operator you'll speak with anyone who answers at the out-of-town number you're calling. The lower rates on "station" calls can mean important savings for you.
