PROGRESS

Now is the time to take stock — to look back — to look forward — to evaluate our achievements and mistakes . . . to determine how we can use this knowledge for a better future! Now is the time to make Progress, Peace and Prosperity, the resolution for the coming year — for your family, your community and your nation. As Father Time turns another page on history, and notes time's passing parade, we must again dedicate ourselves to the many important precepts that are our heritage. From out of the days of pioneer achievement to this streamlined jet age comes the great know-how of American industry . . . the idealism of our democracy . . . our earnest desire for a free, secure world! Progress is not one man's job — it is the concerted drive of all! Every hamlet . . . every farm . . . every shop and factory in the land is a vital asset in converting our many dreams into fact. Remember! By exercising the many rights of American citizens — by taking active part in the fight for a better world — we stand ready to meet the many challenges in the march of time — and progress.

"A GOOD PLACE TO WORK"
