(Continued from Page 1) since that survey was made, and if the city had acted then, the problem facing the community now would have been

But, instead, we have made recreation a political football.

A number of city officials seem to have the attitude "we want to do the job, but we want the schools to furnish the playground, the equipment, the money and to be responsible for all those things." This, in our opinion, is not being realistic.

Such a program would be comparable to the 10 cents per \$100 assess avluation collected in Torrance from 1926 to 1947 as a "recreation and music fund." Did it go to "recreation and

music?" Look up the records, and find out to your disappointment where it

That 10 cents per \$100 now would produce in excess of \$60,000 per year for recreation, enough to provide parks, playgrounds, adult and children's play programs night, day, vacation and during the school months, throughout the year - if properly handled and properly

Let's get down to business.

We say the city has had enough time to plan and build a program. Let's be fair to the people and give the schools a chance — at least a look-in. Let us have a good, coordinated school and city recreation program — for the people, the kids and adults — not as a political

Red Cross Drive for Thurs., Mar. 5, 1953 Funds Begins Today
