Cramped Quarters Eliminated

By Bob Wermuth
Plywood Ltd.

If your home suddenly seems small and cramped, it may not be the fault of the home. Often the inadequacy lies not so much in the size of the rooms but in the lack of important storage facilities.

If this is the case, then here's a tip. Built-ins, with a capital B. Built-in storage units designed

to capitalize on the unused length and height of your rooms without sapping their valuable floor space.

For example, there's the flexible storage wall. Here's a full wall storage unit with plenty of space for work, recreational and entertainment facilities. There's a drop-leaf writing desk and a fold-down refreshment bar; spacious book shelves; cabinets with sliding doors for storage and many others.

Complete construction plans with a bill of necessary materials for any of these space-saving, problem-solving built-in units are available through your local lumber and hardware dealer.

Police dragnet in action. Hundreds of city, county, state and Federal law-enforcement agencies in the West are linked by Pacific Telephone's teletypewriter service. They use it to exchange information on wanted persons, stolen cars, and other urgent matters. Some agencies use our regular teletype service. Others use private networks we provide for them. Working with Western law-enforcement agencies is, of course, another way we serve you. And in this part of our job, as in all others, we try to furnish the best possible service at the lowest possible cost. Pacific Telephone works to make your telephone a bigger value every day.
