

VIEW OF STORE: Here is the Big Do-Nut drive-in which will serve free doughnuts and coffee tomorrow and Saturday, grand opening days, from 6 p.m. to midnight. Hours of the store are from 4 a.m. to 1:30 a.m. the next day.

Planners To Discuss Building Restriction

Formation of a building restriction zone in the Welteria Lake area will be discussed by the planning commission at a first hearing set for July 7.

The proposed restriction zone, is to be formed for the purpose of allowing the construction of a retention basin to aid in the drainage of the area, which floods in the rainy season.

The retention basin, which will cover 50 acres, will be constructed by the city of Torrance. It is necessary because the Lomita storm drain, to be constructed by the county, is not of sufficient size to carry the total amount of run-off water. This run-off will be retained until the water in the county area goes down enough to allow the drain to operate.

Boundaries

The restriction zone is bounded on the north by the proposed extension of Lomita boulevard; on the south by a line running roughly 600 feet from and parallel to Pacific Coast highway, which cuts into 22nd street; on the east by Madison street; and on the west by a line near Calle Mayor.

The zone will not affect the proposed South Torrance high school, which will be filled to a 75 foot elevation with existing

dirt in the area. In all lands lying before the 75 foot elevation building will be restricted.

Retention Basin

The retention basin, itself, is to be constructed in a parcel of land between 238th street and 234th street on the south and north, and between Hawthorne boulevard and Madison street on the west and east.

From the basin, a Welteria sump storm drain will be constructed across the northerly side of the Torrance municipal airport, parallel to Lomita boulevard to 248th street and Pennsylvania avenue. This drain will be connected to the Lomita storm drain, which will carry excess water into a Harbor City drain which empties into Bixby Slough.

Suspect Poison In Dog Death

Mr. and Mrs. Robert Vrana of 5115 Milne drive lost a ten-month-old pedigree boxer recently. Evidence pointed to poisoning.

New Landmark Set For City Of Gardena

Give Away Free Doughnuts, Coffee On Opening Days

Gardena has a new landmark. Situated at Compton boulevard and Western avenue atop the Big DoNut Drive-In is a huge doughnut measuring 30 feet in diameter that will be seen for miles in every direction, according to co-owners Russ and Hank Wendell. Distance from the street pavement to the top of the doughnut is equivalent to the height of a 4-story building. Doughnut weighs 200,000 pounds.

To acquaint the public with their new enterprise, Wendell brothers will give free coffee and doughnuts on the two grand opening days, tomorrow and Saturday from 6 p.m. to midnight. Hours of the store will be from 4 a.m. to 1:30 a.m. the next day.

This is the third store in a chain. Others are situated at Normandie avenue and Century boulevard and Freeman avenue and Manchester boulevard. Russ is the sole owner of the Normandie-Century shop while he and George Wilson are co-owners of the Freeman-Manchester shop.

According to Russ Wendell, approximately 13 million doughnuts have been sold since the inception of the company which was formed in 1950.

TEACHER PAY-HIKE POSSIBLE

Torrance teachers will receive a salary hike in the fall if there are more funds coming into the school coffers than presently anticipated, the board of education ruled at its last meeting.

The board will not know until September if this can be done. This question does not affect the automatic pay boost which teachers receive as they move from one salary step to the next.

In the meantime, the board acted to raise the superintendent's salary by \$500 bringing it to \$13,500. Expense money was raised from \$40 per month to \$75.

This pay boost is roughly in line with last year's salaries paid superintendents in a number of unified school districts.

Painting Stucco

Answers to questions about Nalcrete

Q. What new development has revolutionized the painting of stucco homes?

A. "Dutch Boy's" amazing new polymer paint, Nalcrete.

Q. How does Nalcrete differ from ordinary paints when first applied?

A. Ordinary stucco paint often looks blotchy at first then "weathers" out to a uniform color. But Nalcrete gives a beautiful, uniform color the instant it is dry.

Q. What happens as Nalcrete "ages"?

A. Nalcrete holds its color without fading; washes sparkling clean in hard rains, leaves no dirty streaks. It defies sun, storm and fog, and, most important, it does not react with the alkali present in most masonry surfaces.

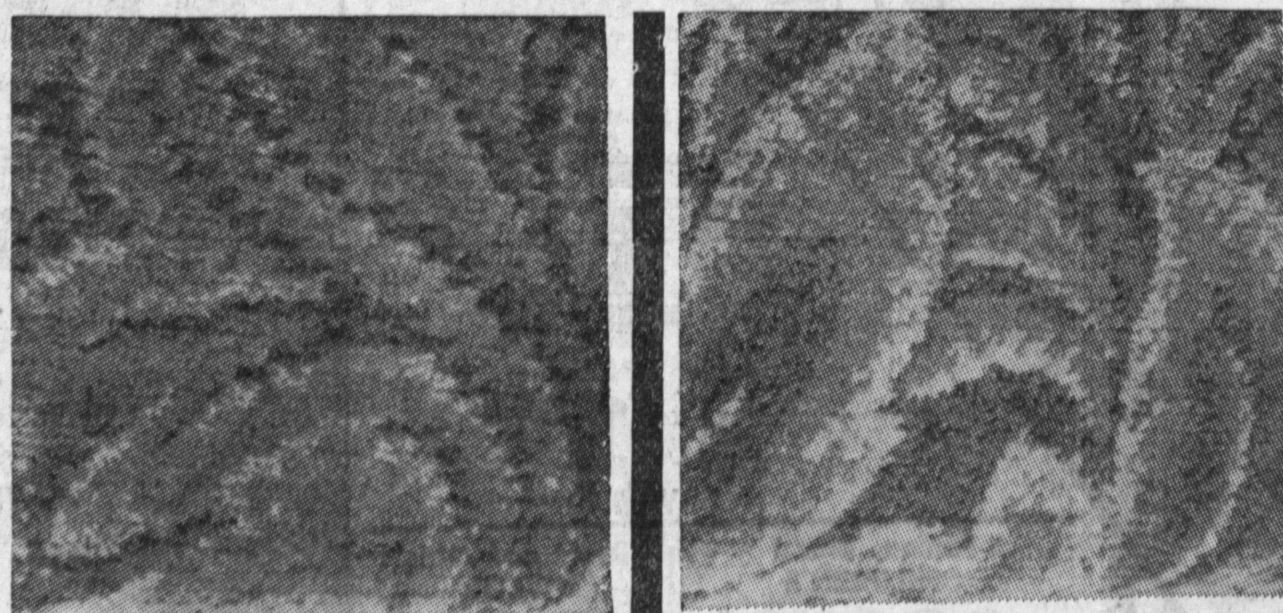

Q. Is Nalcrete available in colors as well as white?

A. Yes... in a wide range of colors from the "Dutch Boy" Color Gallery, plus easy intermixes.
