Take The Guessing Out Of Dressing

By KATHERINE COLEMAN

How much money do you throw away yearly on clothes? Most women buy clothing emotionally and impulsively. Planned buying saves you money and gives you confidence in your appearance. You should know which colors create the proper interest or drama for you, to merge with your personality. Learn to use three color values, most people use only two. Use two-thirds dark and one-third light color, but never let the color dominate you.

The keynote to dressing is simplicity, but not monotony. This is where a working knowledge of accessorizing pays off in appearance and money saved.

Here are three things to look for in each piece of clothing you buy. You can remember them by the letters D. F. E., Design, Fabric and Fit. Remember these letters when you shop.

The most beautiful clothes, on the most beautiful women in the world will lose all of their charm and beauty without good posture. Aren't you curious about the colors that would do the most to bring out the real you? What about that neckline or those accessories you choose. Wouldn't you feel better if you knew what was just exactly right?

Inquire into the classes in **CHARM AND SELF IMPROVEMENT** being held here in Torrance. Talk it over with Katherine Coleman. Phone FAirfax 8-2136. Classes for teen-agers and women in all walks of life. Prices are quite reasonable—you can well afford.—Adv.

WHAT'S DOING

New cable sheath saves money

If you look closely at the telephone cables in the picture—both similar to the ones that carry your calls—you'll see a difference in their coverings. The outside of the cable on the left is made of lead. And, formerly, only lead did a good job of protecting the vital wires inside. But now we have a new cable covering called "stalpath" (the one on the right). Perfected after long research, it's made of aluminum, steel, and plastic. Stalpath weighs less than lead and costs less—up to 43 cents a foot less. We're using it wherever we can . . . to

furnish more service, good service, at low cost to you. Pacific Telephone works to make your telephone a bigger value every day.

Easy way to speed long distance calls

You'll get faster long distance service if you give the operator the telephone number you're calling, rather than just the name and address. And to help you keep out-of-town numbers handy, we'll be glad to send you a free booklet to list them in. For your copy, just call, write, or drop in at our business office.

You can save time and steps

For just pennies a day, you can enjoy the privacy and convenience of an extension telephone in any room of your home. Extensions save steps, save time . . . make it easier for the family to place calls, receive calls. No additional outside wires or equipment are needed—just the telephone itself. To get your extension, call our business office. Pacific Telephone.
