**New, 1956 General Electric
FILTER-FLO Washer**
Removes Lint, Sand and Soap Scum

HOW THE G-E FILTER-FLO WASHER WORKS

This new General Electric Washer circulates and filters your wash water at the rate of six gallons per minute—to give you whiter, brighter clothes.

As the Filter-Flo Washing System circulates the water, sand settles out the bottom of washbasket, soap scum floats away, lint is trapped in the filter.

BIG CAPACITY, TOO!

This new G-E has over 50% more clothes capacity than many other automatics. No need to split a big wash into two separate loads. Plus Water Saver Control for small loads.
