Union Carbide Makes \$98,444 Distribution

A cash distribution of \$98,444 under an employee savings plan in which the company adds as much as 30 percent of the employees' savings was made today to 171 employees of the Torrance plant of Union Carbide Chemicals Co.

The employees saved \$76,218 of their own money through this plan during the last two years and the company added \$22,226. Throughout the country employees of Union Carbide Corp. received \$54,105,566. Union Carbide Chemicals Co. is a division of Union Carbide.

Under this plan, employees set aside up to 7 1/2 per cent of their earnings and the company adds 10, 20, or 30 per cent to this, depending on whether the employee has one, two, or three or

more years of company service. The plan contains provisions for short-term savings and long-range investments or a combination of both. This flexibility, which is one of the outstanding features of the plan, permits employees to set aside cash for a distribution every two years and also provides the choice of long-range investment in either US Savings Bonds or Union Carbide stock.

Savings plans were made available to Union Carbide employees as early as 1935.
