

Good Health

The human body is the most intricate "machine" ever created. Even those who have devoted their lives to the study of it do not completely understand all of its processes.

The layman who enters into an involved contract without the counsel of a lawyer - the unformed investor who does not seek competent financial advice - the person without mechanical training who tries to repair his car - all may have serious difficulties or losses which expert advice or assistance would have prevented. So it is with self-medication.

But no one would condemn a motorist for changing his own tire instead of calling a mechanic. Similarly, all self-medication cannot be condemned.

Self-medication, however, should never be attempted in the treatment of serious, chronic, or frequently recurring disorders.

There are many products on the market today that are useful as first aid treatments, and others of value in relieving symptoms of minor acute ailments and superficial lesions. But if the illness persists or relief is not obtained in reasonable time, a physician should be consulted.

For example, there are many satisfactory laxatives to relieve most cases of occasional or temporary constipation. But it would be dangerous for a person who has symptoms of appendicitis to use a laxative, because serious complications may result. To guard against such possibilities, federal legislation requires that certain such warnings be placed on such products as: "Not to be used when abdominal pain (stomach-ache, cramps, colic, nausea, vomiting or other symptoms of appendicitis are present."

HEY KIDS: Six space commander helmets, such as the one shown above, will be given free to lucky winners at a drawing to be held in the Stadium Theatre during its Saturday afternoon matinee. The helmets are being donated by TV Studio, 2223 Torrance Blvd., to help bring parents in to the store to see the new Zenith TV models.

LOOK AT THESE EXCITING NEW FEATURES:

ROTARY BARBECUE brings the flavor of outdoor cooking indoors - without the dirt and fuss. Smoke, spatter vanish in the Gas flame. As with broiling, Gas lets you barbecue with broiler door closed.

BURNER WITH A BRAIN eliminates pot watching - can make any pan automatic. The sensing element touches pan, takes its temperature, then raises or lowers flame to maintain pre-set cooking heat.

AUTOMATIC ROASTING THERMOMETER lets you cook meat to order - well-done, medium or rare. All you do is set the thermometer, insert it into roast. Oven shuts off automatically when meat is done. See the new Gas ranges that are automatic all the way - at your dealer or Gas Company.

*For modern Gas service beyond our system, see your L-P Gas dealer.
