Local Woman Appointed Assistant to Bob Young

Mrs. E. R. Hoppe, 620 Via Monte D'Oro, Hollywood Rivera, has been delegated one of the many assistants of Robert Young, movie and television actor, in his work as honorary chairman of the membership drive of the Myasthenia Gravis Foundation. Mrs. Hoppe will serve under him as the South Bay representative.

Myasthenia Gravis means "grave muscular weakness" and can strike anyone from a newborn infant, to men and women in their seventies; and can effect an individual in many ways from partial disability to complete helplessness — and in many, eventual death. This disease has been known for hundreds of years, but only recently have most doctors learned to know it when they see the first symptoms and offer help to its victims. It is suspected there are 50,000 to 100,000 people in the United States today afflicted with the disease.

In addition to aiding the Membership Drive, Mrs. Hoppe heads an auxiliary unit called the Junior Beavers whose entire activities are dedicated to raising research funds for this dread disease.

"Research is not the only phase of operation of the Myasthenia Gravis Foundation," stated Mrs. Hoppe. "Program Chairman of church or civic organizations can book the color sound film, 'The Treatment, Diagnosis and Management of

Snowflakes ... rare sight in SOUTHERN CALIFORNIA

... but in most parts of the country snowflakes are all too common these days. They mean red cheeks and aching shoveling muscles, blustery winds and a roaring fire in the fireplace.

To motorists, snowflakes mean it's time to protect their cars with anti-freeze. Even car owners from this area who plan to drive north, or into the mountains, will add anti-freeze to their automobile cooling systems as a precaution.

The men and women of CARBIDE, who make great quantities of all-winter anti-freeze, are proud that their work contributes to the nation's motoring safety.
