

U.N. Group to Mark 'Human Rights' Day

All South Bay residents interested in a discussion of human rights are invited to become guests of the American Association for the United Nations on Human Rights Day, Tuesday, December 10. The AAUN program will begin at 8 p.m., at 306 South Catalina ave., Redondo Beach, in the Auditorium of the Gas Company Building (across the street from the Elk's Club). It will mark the ninth anniversary of the Universal Declaration of Human Rights, first proclaimed to the world by the United Nations General Assembly in 1948.

UN films, striking photographic displays, literature and a discussion period during refreshments are part of the program. The rights of the "littles humans," the world's 900 million children, will be emphasized in two short films produced by UNICEF (The United Nations Children's Fund) and in a special display of UNICEF Greeting Cards.

Air Dryers for Industrial use Made by Local Firm

Industrial air dryers which remove water vapor from compressed air to eliminate condensation of water in piping systems are available from Geo. W. Leshman at Torrance Blvd., industrial distributor. Manufactured by T. Melsheimer of 22610 S. Western ave., also of Torrance, the air dryers have applications in chemical, aircraft, automotive, rubber, instrument, utility, missile, petroleum, steel, paper, container, and aircraft maintenance industries.

The Melsheimer air dryers are designed and constructed for continuous, 24-hour heavy-duty operation. Economical to install, they require no foundation. The completed units are shop-assembled on an integral structural steel base, with all piping, controls, etc. self-contained. The main air flow is piped through the contactor, small cooling water and gas lines are connected and the dryer is on the line.

The Melsheimer dryer is self-contained and self-powered by compressed air. Maintenance is limited to a daily check by the operator. The only moving part is the reciprocating pump. Elimination of water in the piping system follows installation of the dryer, thus eliminating maintenance of plant air piping systems. Draining of traps and blowing of drip legs is never required.

The dryers are installed immediately downstream from the air receiver, bringing saturated wet air from the compressor receiver into intimate contact with Triethylene Glycol. The

water vapor is absorbed out of the air by the Glycol, and the absorbed water is removed from the Glycol by distillation. After distillation, the Glycol is circulated by a pump for re-use. The process is continuous, non-cycling and automatic.

The unit is available in standard sizes and can also be furnished to meet special conditions of pressure, extreme dewpoint depression, and special operating conditions. Units are in operation across the nation in major industrial plants. Users state cost savings amortize equipment cost in first months of operation.

Torrance High Pupils Hear About Meat

Briefly describing the historical background of the breeding and cross-breeding of cattle that has produced the meat-heavy cows of today, Bert Simmonds spoke to the Boys Foods class and the Home Economics II class on meats and meat processing.

Simmonds, member of Local 551 of the Meat Cutters and Butcher Workmen of North America, traced the path of cattle from the open range through the feed pens and slaughter houses of the processors to the end of the trail, the local meat market.

Advising the girls and boys of the best types of meat to purchase for particular purposes, Simmonds brought a 17-year knowledge of meat cutting to the students. Describing the different inspections required by our government to protect the consumer, Simmonds talk was concluded with a discussion of the new Poultry Inspection Law passed by the California State Legislature this year.

"Presentations of this type are a fine addition to our daily teaching," stated Miss Jo Kaye Meek, Home Economics teacher at Torrance High School. "We welcome the excellent contributions made by experts in our own community."

Board of Supervisors Elects Burton Chace as Chairman

At its annual reorganization meeting, the Board of Supervisors Tuesday unanimously elected Supervisor Burton W. Chace as its new Chairman.

Nominating Chace, retiring Chairman John Anson Ford pointed out "His long record of public service aptly qualifies him for this important duty."

Chace had served previously for a year term as Chairman of the board, and prior to becoming a member of the Board of Supervisors, for six years was Mayor of the City of Long Beach.

Accepting appointment, Chace said, "It is with a great deal of pleasure that I accept the Chairmanship of this Board of Supervisors for the coming year, and I am highly complimented that my colleagues have chosen to bestow this honor upon me."

"The confidence which the members have placed in me is sincerely appreciated and I pledge to carry out the duties to the best of my ability."

"While I am reluctant to cast a shadow upon the occasion of my selection as the Board's new Chairman, two co-related subjects deserve mention at this time. They are High Taxes and the alarming increase in Charity Applications."

"As I sense the feeling of the citizens of our County, they are looking to the Board of Supervisors for good sound business administration. Tax reduction, in my opinion, is the number one concern of this Board and I know that together we five members can set a pattern for other Governmental agencies in the County to reduce the property owners tax bill. This can only be done by paring our budget down to essential projects and services and through the elimination of duplicate services. It is most fitting that we take a good look at our operation and see where greater efficiency can be had and costs reduced."

"My second concern is over the sharp increase in the number of people seeking relief over a year ago. Last October the General Relief applications (all County money) totaled 3,516. In October, 1956 the total applications received was 2,518. This indicates an increase of about 40 per cent over a year ago."

"In the Aid to Needy Children category (Federal, State, and County funds) there has been a 31 per cent increase in applications during the same period. Old Age Assistance applications were 1,719 in October of 1956 and in October of this year they totaled 2,347—an increase of 37 per cent."

"The applications, of course, are not all reflected on our assistance rolls because many of the applicants are located in other jobs through the aid of our Department of Charities. However, the department reports that such jobs are becoming more difficult to find."

"It is therefore essential that this Board do all within its power to assist new non-defense industries as well as new defense industries in locating within our boundaries so that those who are unemployed as a result of conversions in existing aircraft firms may be absorbed by new labor markets."

"In closing, I shall look forward to a harmonious working relationship with my colleagues on the Board, our departments, other governmental jurisdictions and our constituents."

Extension of Hawthorne Boulevard from its present terminus at Pacific Coast Highway across the Palos Verdes Peninsula to the ocean at Palos Verdes Drive South was assured today with the approval by Chairman of the Board of Supervisors, Burton W. Chace, of plans and specifications, for the first leg of the project.

At the same time, the Board called for bids covering the initial phase of the extension from Silver Spur to Crest Road for an estimated cost of \$400,000. Chace pointed out that the project of Hawthorne, a "master plan" highway, will ultimately provide direct access from Los Angeles southerly to the ocean and will help relieve week-end traffic congestion along the scenic Palos Verdes Drive South.

According to Road Department officials, work on the first phase of the program is expected to get under way within the next two months. The first serious step looking towards a consolidation of certain city and county governmental services was taken by the Board of Supervisors Tuesday when they approved appointment of a committee to look into such a study.

The Board, on motion of Supervisor Warren Dorn, named its Chairman Burton W. Chace as their representative to meet with the Chairman of the Los Angeles County Division of the League of California Cities and the Mayor of Los Angeles to explore the matter.

Dorn's resolution further called for the three titular heads of government, if they thought it feasible, to setup a meeting between the Board of Directors of the League of California Cities for Los Angeles County, the Board of Supervisors, and representatives of the unincorporated areas.

Commenting on the resolution, Chace said, "While I strongly approve the idea that we must, in the interest of economy, do something about the consolidation of certain city and County functions, it will never be my policy to usurp from any City governmental functions that they do not wish to surrender."

Rotary to Hear Of Advances In Electronics

Recent advances in electronics, especially in computers, and their effect on the average Torrance businessman and industrialist, will be explained by Dr. Montgomery Phister of the Ramo-Woolridge corporation, when he addresses the Torrance Rotary club's December 12 dinner meeting.

Dr. Phister, of 4189 Via Solano, will speak on "Electronics in Business and Industry," and tell the Torrance Rotarians of new and radical advances in electronic techniques and procedures which are adaptable to production, data processing, and business decision-making activities in industry today.

The Ramo-Woolridge engineer was closely associated with the development of the new RW-300 digital control computer. Manufactured by Ramo-Woolridge, the RW-300 is the first electronic computer engineered specifically for fully automatic control of industrial processes such as those found in petroleum refining, petrochemical, chemical, metals, glass, food and paper industries.

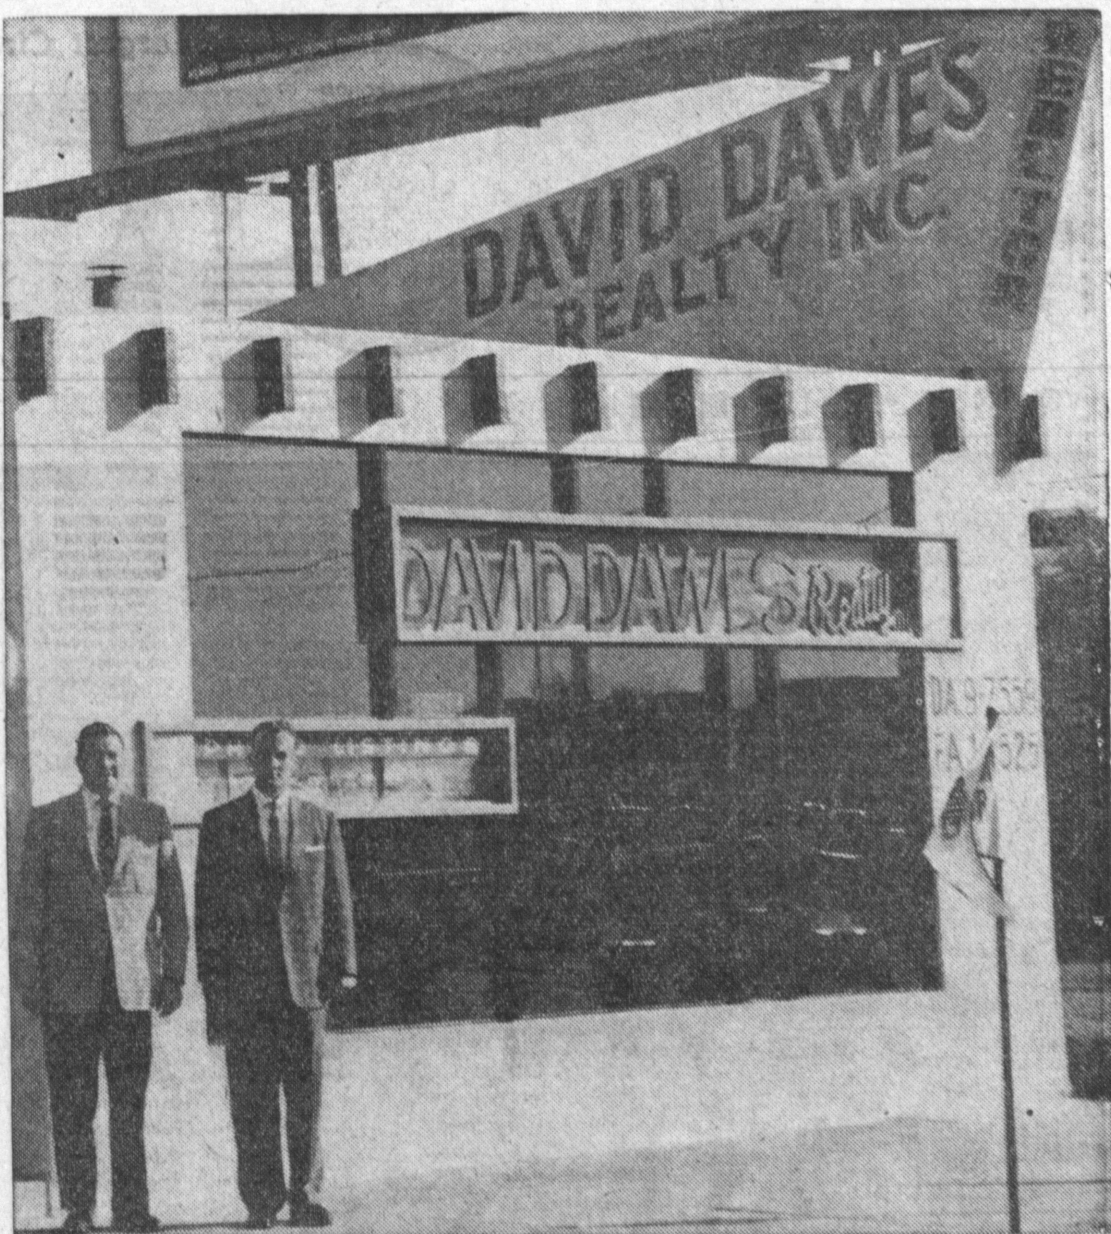

Dr. Phister attended Stanford university, where he received the BS and MS degrees in electrical engineering, and Cambridge university in England, where he received the Ph.D. degree in physics. He is a lecturer in engineering at the University of California at Los Angeles.

Dr. Phister is the recipient of the Fulbright scholarship, and of the National Science Foundation fellowship. He is a member of the Professional Group on Electronic Computers, Association for Computing Machinery, Phi Beta Kappa and Tau Beta Pi, and an associate member of the Institute of Radio Engineers.

Driving a vehicle in mechanically unsafe conditions is a misdemeanor in many parts of the United States and Canada, and unsafe everywhere.

SERVING THE SOUTHWEST AREA for the past 15 years, David Dawes Realty, Inc. are now in their new modern five room office, which is located at 15714 Crenshaw Blvd. in Gardena, just north of Manhattan Beach Blvd. David Dawes, a realtor and member of five realty boards including Inglewood, Hawthorne, Los Angeles, Southwest and Gardena, was recently elected secretary of the Gardena board. Associated with Dawes are David Dawes Jr.,

Bert Halverson, Don De Silva, Sol Levine, Dan Solomon, Jerry Brandon, and Jean Calfee, secretary. The new office has many convenient features including large photo listings and drive-in parking area. The expansion of this office is attributed to the permanent growth in the Southwest area. Shown above, in front of the new building are David Dawes Sr., left and David Dawes Jr.

Eagles Upset Warriors in TouchFootball

The Torrance Optimists Eagles became the Notre-Dame of the city's touch football league by upsetting the Bowl-O-Drome Warriors, undefeated in more than 20 games this season.

In one of the hardest fought games seen in touch football play in Torrance Park, the Eagles bested the Warriors 13 to 7.

In the closing minutes of the first quarter, Sonny Vasquez of the Eagles handed the ball off to Don Coll who outprinted the Warrior ends to cross the goal line for the first touchdown. The Eagles chalked up the extra point on a pass play.

The Warriors were fired up as the second quarter opened and marched the length of the field. Warrior Lenny Keaton found a hole in the Eagle defense and grabbed a Vance White pass for the Warrior score. White zipped around end for the extra point to tie up the score.

Both teams threatened in the third quarter and the Warriors scored on a pass play from White to Keaton but it was called back by a penalty. The Warrior's forward wall of Ron Hagenbaugh, Gerry Fink, Steve Wirtz, Earl Lane, Gary White, Arnold Quinn, Don McHenry, Ray White, Chuck McIntosh and Keaton kept the Eagles from scoring. If they broke free, Warrior backs Allen D'Ornellas, Alan Billings, White and Tetsuo Yoshioka kept them from scoring.

With five minutes left in the game the Warriors blocked a kick on the seven yard line and went over to score but the t.d. was nullified by a penalty. In the next six plays the Warriors were penalized back to their own two yard line but Coach Ernie Dandoy of the Eagles at this point asked that the Warriors be given the benefit of the Eagles declining the full penalty and the ball was moved to the 10 yard line.

With one minute and some seconds to go Vasquez of the Eagles, behind beautiful downfield blocking by Mike Marshall, Clyde Taylor, Tommy Shepherd and Steve Waters ran right end scored the winning touchdown.

Warrior Midgets Down Walteria

The Bowl-O-Drome Warriors Midget team won their first tilt in the playoffs for the City Championship by swamping the Walteria Park team 22 to 0 in one quarter and seven minutes before the Walteria team forfeited because of the power of the Warriors and the rain.

Carson Club Plans Party For Children

By J. R. GATELEY CARSON OPTIMIST CLUB—President George Oldorp announced that his club is now making plans for a Christmas party for children at Scott Park on December 18. Meetings are held every Monday night at Crow's restaurant.

SENIOR GIRL SCOUT TROOP 435, leader Mrs. Gladys, has members of her troop busy making circle dolls to send to a children's hospital. The girls are also working on Civil Defense operation training to be on call instantly in time of emergency. They are also making emergency kits for civil defense.

KEYSTONE WOMEN'S CLUB President Mrs. Theodore Bredahl, announced that the club is having a Christmas party at the club house on East 220 st. on December 11. There will be a pot-luck luncheon at which time members of the club will exchange gifts.

DEL AMO P.T.A.—Mrs. Joy McCune, publicity chairman of the Del Amo Parent-Teachers Association announced that their group won an "Oscar" as the first to go over the top in the Community Chest campaign. Mrs. Florencio Vincent was chairman of the Community Chest drive. Mrs. Sterling Megill is club president.

GOLDEN BEAR TRIBE of the Woodcraft Rangers, headed by Ray Wetzel as guide, is selling fruit cakes to members of their families and friends to raise money for craft supplies. Wetzel has announced that members of his tribe have entered into competition with other Rangers to see which boy could sell the highest number of fruit cakes. The boy winning the contest will receive a free trip to Ah Da Hi camp next summer.

CARSON CHAMBER OF COMMERCE meeting will be held next Monday night, December 9, in the office of Drake

craft Boat Works, 223rd and Avalon. John Calas is the president. ASSEMBLYMAN Vincent Thomas will give a last minute report about the request for a traffic light at 234th and Figueroa sts. when he speaks to the Carson Civic Betterment Association next Tuesday at the Stephen M. White Junior High school, 220th and Figueroa. Albert Cartwright, principal of the school, will introduce Thomas. They were school mates at the San Pedro High school.
