June bond issue outline given to school board

An outline of a proposed June bond issue to provide classroom seats for an enrollment increase of 95,000 pupils in the Los Angeles City school system by 1961 was presented this week to the city board of education's building committee.

The program was in the nature of a progress report of bond issue planning underway since last year. It was presented by Associate Superintendent Virgil Volla, chief of the city schools' building program.

The proposed bond issue, if adopted, would provide funds so that the Los Angeles schools' building program—largest of its type in the nation—would continue at its present pace of erecting buildings at a rate of approximately \$1,000,000 weekly.

Since 1955, when a bond issue for \$133,000,000 was overwhelmingly approved by school district voters, classroom seats for approximately 75,000 youngsters have been provided in all areas of the rapidly growing system.

As outlined to the Board the proposed bond issue totaled \$158,427,000 for new schools and additions to existing schools from elementary, through junior and senior high school, to junior college and adult school levels.

If adopted in its present form, the summer bond issue being contemplated would be the largest school bond issue ever pre-

pared for approval to Los Angeles city school system voters. The bond issue's total will be set by the board of education on March 13, according to present schedule.
