We're investing another \$74 million for expansion in California in 1958

CALIFORNIA is growing at such a pace that, by 1965, it is expected to have the largest population of any state in the Union.

This confronts General Telephone with many challenges—especially because so many of the communities we serve are in suburban areas—the fastest-growing areas in the country.

To keep abreast of this rapid growth, we're installing new telephones at the rate of nearly 8,500 each month in Southern California.

Yet the big job of meeting the demands of this growing population still lies ahead.

To provide these many new telephones when and where they are needed in the 127 communities we serve, our company will spend \$74,000,000 for new plant and equipment during 1958. Nearly all of this money—plus millions more for future expansion—must be raised through the sale of our securities.

So our responsibility is clear.

We must make certain that those who purchase our securities, as well as present shareowners, are paid a reasonable return for the use of their money.

We must make sure that we furnish the very finest telephone service at fair and adequate rates.

This is the sound way to grow.

GENERAL TELEPHONE
One of the World's Great Communications Systems
