EYESTRAIN!

What's the visual range of your job? From close-up to 30

inches? From reading range to beyond arm's length? If you

wear glasses, it is imperative that visual corrections match your

working pattern. Otherwise, eyestrain is inevitable. Let us

make a "working area analysis" of your job. From this data,

lenses can be ground in our own laboratories to provide exactly

the corrections you need. Ask for a demonstration.
