PUT YOUR BEST FOOT FORWARD

By FLORENCE MARY BLAKE
Lecturer, Teacher, Consultant

Have a beautiful summer. This is more than a wish for a happy vacation, it is a plea to you girls and women to be "beauty-wise" this summer. Now that vacation time is here and that well-earned rest is about to be a reality, I hope you will welcome a few hints on how to stay pretty while you are having fun. Whether your plans include far-away places or just a bit of lazing on our wonderful beaches, please remember that the sun can be your friend or your enemy. It can be health-giving and provide you with a glowing tan or if you are not a bit careful it can dry out your skin and give even the very young fine lines and wrinkles. How do you think prunes are made? They just leave nice plump plums out in the sun until they are all dried out. Don't let yourself end up the summer looking like a prune. Start your tan in small doses and if you have a fair skin don't stay out more than 20 minutes for the first few times. Then get under an umbrella or don a robe. When you are near the water the burning is twice as possible. Use one of the many fine products on

the market that filter out the burning rays and help you tan gradually. Always use a good lotion or lubricating cream each time you finish your sun bathing. Gradually increase your sun dosage and avoid that broiled look. Keep your hair covered whenever you are out in the sun or driving in the wind. Brush your hair 100 strokes a day to keep it shining and soft. Sun bleaches the hair so quickly and it takes a long time to get it back in condition after a summer of fun in the sun. Give your feet a bit of extra care. Walking barefoot is fine for the arches and feet but dry rough heels and thickened soles of the feet are slightly hard on silk hose. Don't forget your feet when putting on the lotion. Don't you be one of those who end up the summer with un-ightly, straw-like hair, parched skin, brittle nails, squint lines around the eyes, and cloused feet. Get good sun glasses and wear them when at the beach or driving in the glaring sun. Have fun but be good to yourself. Get in the swim of things but keep beautiful while your day in the sun is here.

Name Leadership For Campaign

Harbor Area YWCA has started work on recruiting leadership for the forth coming Community Chest campaign. Mrs. Don Wolf is Community Chest chairman of the Harbor Area Board of Directors of this Red Feather Agency. On the area level, Mrs. Carl Taylor is in charge of the area Chest office. She is at work recruiting clerical volunteers. She is asking those who sign up for this section to allow a block of time, either morning or afternoon and a regular day each week. Mrs. C. R. Halfpenny, Community Chest chairman for the San Pedro branch, reports that they have accepted the responsibility of three of the five divisions of the residential drive. These key positions have been

filled, she reports. Mrs. E. C. Spires will head division 704, Mrs. Larry Lightner 701, and Mrs. Cliff Horton, 705. In Torrance, Mrs. Mary Pagao of the Torrance branch committee will head division 743, while in Wilmington, Mrs. E. G. Croom as branch Chest chairman, will be in charge of division 711. Workers are needed in all these areas and volunteers may call the local YWCA. Use Press Classified Ads.

Higher Salaries Needed for Better Schools, NEA Says

Education cannot fully serve the national interest until teachers' salaries reach professional levels. This point has been driven home to the more than 15,000 educators attending the 96th annual National Education Association Convention in Cleveland which wound up six days of meetings here July 4, said Edward F. Sheets, president of the Torrance Education Association.

Many of the nationally-known speakers went a step further to declare that federal support is the only hope for a major breakthrough in this economic plight of the public schools.

During their scores of work sessions, convention delegates have heard chapter and verse on the present status of teachers' salaries as described by speakers who earlier this year testified before Congressional subcommittees considering aid-to-education bills.

Many of the delegates got their first full-dress explanation of the NEA's billion-dollar teacher salary and construction proposal which has been introduced in the U.S. Senate and House. This legislation calls for federal sharing in the basic financial support of education. The measure is limited to teacher salaries, classroom construction and basic equipment in public elementary and secondary schools. States have full discretion in dividing federal allotment between salaries and construction, Sheets said.

The answer to the question of

Whisker Contest Blanks Available

Entries are still being accepted for the Beard Contest for Torrance-Ranchero Days.

All Torrance residents who have a "crop" of whiskers are eligible for the contest which will be held on Friday, July 18, at 8 p.m. at the corner of El Prado and Sartori in downtown Torrance.

Chairman Jack Phillips, said that entry blanks are available at Handy Andy's Barber Shop at 1104 Crenshaw blvd.

A significant change in the relative status of teachers. Average earnings of all wage earners from 1939 to 1957 increased 231.5 per cent whereas teachers' earnings climbed only 213.4 per cent.

NEA convention speakers urged these future changes in the salary picture:

Teacher salary schedules must be restructured to allow at least a doubling of minimums with 8 to 10 years.

At a minimum, teachers' salaries should be 50 per cent higher than the average payroll worker. Projecting this advance on the basis of recent trends would raise teachers to an average salary of \$7550 in four years.

Boards of education will have to give greater recognition to the value of advanced degrees. An industrial employer now places a higher premium on master's and doctor's degrees than the typical school board.

Education Trend Is Discussed

"How Did We Get Here in Education?" was the thought provoking subject of Mrs. Edith Stafford yesterday at the installation meeting of Women for Good Government in the San Pedro Woman's Club building. Mrs. Stafford is the mother of two children who went through Los Angeles schools and was a member of the Board of Education for six years. She served as president of the board, chairman of the committee of the whole, chairman of the building committee, chairman of personnel and school committee, and was on the advisory committee for L.A. State College.

Mrs. Alfred Jorgensen, president, led the meeting of the organization, whose motto is "Justice, Honor, Freedom, These We Will Preserve."

Officers installed for the coming term were Mrs. Charles F. Shute, president; Mrs. Kenneth Ward Smith, vice president; Mrs. Ralph Williams, recording secretary; Mrs. Gilbert C. Van Camp and Mrs. Oscar DeJorf, corresponding secretaries; Mrs. Curtis Johnson, treasurer.

Driving Teachers Win Scholarships

T. G. Misenhimer, of 3610 West 226 street, and W. O. Goodhue, of 18430 Doty avenue, Torrance, both driver education teachers, have been awarded Allstate Foundation scholarships to attend the basic driver education course at S.C. according to Dr. John D. Cooke, dean of the U.S.C. Summer Session.

Misenhimer and Goodhue are two of 30 teachers to receive scholarships made available by the Allstate Foundation. This is the sixth year that the Foundation has provided scholarship funds to the University for driver education courses. In the past five summers, the Allstate grants to U.S.C. have provided scholarships for 214 high school driver education teachers, according to Dr. Cooke. These teachers have returned to their schools and have instructed an estimated 72,000 students in the principles and practices of safe driving.
