GIVING APPROVAL to a plan which will extend the opportunity for Air Force ROTC training to freshman students of Ed Camino College are, left to right, Dr. Stuart E. Marsee, who will succeed Dr. Forrest G. Murdock as president tomorrow; Merl F. Sloan, director of student personnel, and Dr. William H. Harless, director of instruction of the college.

El Camino Pioneers Air Force Officers Reserve Training Plan in Junior Colleges

Opportunities for military training concurrent with the fulfillment of educational objectives were outlined today by Dr. Stuart E. Marsee, who will assume the post of president of El Camino College tomorrow. Affecting only full-time male freshmen students, the plan will enable ECC students to incorporate air force reserve officer training with their regular instructional program. Under the new arrangement, which gives students the opportunity to enroll for AFROTC training on a junior college campus for the first time, candidates would enroll through the program as it is administered on the campus of the University of Southern California and would attend weekly classes there. On completion of junior college work, the students would be enabled to transfer to any university or college in the United States that sponsors an AFROTC program. Contemplated scheduling calls for the program to be offered at USC from 5 to 8 p.m. each Tuesday evening or on Saturday morning from 9 to 12, as required. The student would enroll in his major program at El Camino and carry the additional two units at USC as an elective course. If the candidate chooses, he may be commissioned a second lieutenant in the United States Air Force Reserve on receiving his college degree. At this point, he will serve his military obligation as an officer in the US Air Force. Lt. Col. John A. Newbauer, professor of air science for the USAF at USC, announced that university credits for all air science courses will be given, that training will be offered by highly qualified and experienced air force instructors, that students will have the opportunity to obtain, free of charge, sufficient flight instruction by an authorized CAA school to obtain a private pilot license, and that pay as advanced students will total approximately \$600. Payment is not offered in the freshman and sophomore years. The only charge to be made for the training course at USC will be a \$10 deposit on uniforms and books. Should students continue their upper division work at USC, however, and wish to use the AFROTC units to displace regular degree credit for graduation, the prevailing tuition rate will apply to the units so employed. Requirement To qualify for the program, students must meet the normal entrance requirements of the University of Southern California with respect to subject pattern and grade point average, complete the necessary application forms, submit transcripts of high school records, and be free of physical disability. The age limit for application to the program is 23 years and the students must have completed his training prior to his twenty-seventh birthday. Continuance in the program will be dependent upon the student's conduct and academic record at El Camino College and those forced to leave the program for legitimate reasons will be given honorable dismissal status, it was noted. Draft deferment will be given to all sophomore cadets, and fifty per cent of the total number of freshmen cadets reported. However, no freshman cadet will be deferred until he has completed one quarter or semester of academic work, the AFROTC outline states.

Fair Plans in Carson Area Due

Plans for the California World's Fair and possible incorporation of the Carson area will be discussed Aug. 4 by the Carson Civic Betterment Association. The meeting will be held at 8 p.m. in the Stephen White Junior High School, 220th and Figueroa sts. J. A. Smith, president of World's Fair, Inc. sponsors of the exhibit which is to be held in Southern California in 1963, will outline plans for the event. He said that the vacant property owned by the Dominguez Estates Company in the Carson area is definitely under serious consideration as a site. George Larson of Lomita will be the speaker on incorporation, according to Ray B. Wetzel, president of the Carson organization. Some Carson leaders have expressed themselves as in favor of forming a city in the event the world's fair is located there. They also have not given up hope that the Los Angeles Dodgers will seek a stadium site in the area if their Chavez Ravine plans fall through. Don't take a chance! Be safe. JUST FINISHED—Although they are just completed, Walnut Estates is practically sold out. Just a few of these homes are still available. They were constructed by Richard Meine, well known local contractor. They feature 3 bedrooms and two baths, and have such extras as fireplace, stove and oven built in, etc. They are located at 246th and Walnut in Lomita.

Ryan Develops Vertical Jet Reaction System

Ryan Aeronautical Company is developing a jet reaction control system, under a previously undisclosed contract, that can function efficiently with an afterburner in a tactical type vertical take-off and landing plane for the Navy. Frank Fink, vice president-engineering, announced today. The contract, from the Navy Bureau of Aeronautics, follows successful demonstration of VTOL principals in the world's first all-jet plane of its kind, the experimental X-13 Vertijet. This revolutionary aircraft, capable of zooming vertically in take-off from a launching trailer, and maintaining high speed after transition to horizontal position, has made numerous flights to prove that combat planes can operate from any type of terrain without a complex network of airports and even from shipboard at sea.
