Radio Craftsman
TUNER-AMPLIFIER

Here are the most essential elements of a high fidelity system, complete in one unit. The Stradivarius includes a sensitive AM-FM tuner, a preamplifier, record equalization circuits, and a power amplifier.

The tuner section includes a built-in Bar antenna for AM reception and also a built-in FM antenna.

The audio section delivers 25 watts of peak power. Separate equalization controls give twelve effective record equalization curves with additional flexibility resulting from the "hinged" bass and treble controls. A loudness control permits perfect reproduction at low listening levels. There are inputs for all types of phonograph cartridges and outputs for various speakers as well as low impedance output for tape recorder.

Regular \$159.95

Duetto by Jensen

... a complete 2-way system with a special "woofer" plus a multi-cell horn compression driver Tweeter ... crossover system and tuned acoustic enclosure ... add only a modestly priced tuner-amplifier or record player and enjoy sound that would normally cost twice as much ...

Regular \$62.50

Jensen HIGH FIDELITY SPEAKERS AND SPEAKER SYSTEMS

YOU'RE AHEAD WITH JENSEN AUTHENTIC HIGH FIDELITY!

Here is Jensen's finest line of new advanced-design loudspeakers for authentic high fidelity sound ... the most complete range of types and sizes ever available. Established models offer further advances over their previously high standard of performance. New UNAX, DUAX and Coaxial element speakers deliver better sound at higher efficiency at lower cost than previous similar speakers. And the new TRIAX ... another Jensen exclusive ... now brings you a true 3-way speaker at lower cost than some with only two voice coils and driving system.

Your selection from this outstanding group of speakers insures a maximum of the authentic hi-fi sound. There are other speakers in Jensen's price range ... none in its class.

TRIAxIAL® AND TRIAX® 3-WAY SYSTEMS

The famous Jensen G-610A and new G-600 are genuine 3-way systems, the only speakers with three electrically and acoustically independent L-F, M-F and H-F channels for utmost balance, efficiency, smoothness and range extension to upper hearing limit. M-F and H-F sections both employ compression-driver horn-loaded units for low distortion and wide angle dispersion of highs. Separate dual crossover network. M-F and H-F Balance Controls, fully wired. The ultimate in performance in a unitary speaker.

COAXIAL 2-WAY SYSTEMS

Jensen "H" and "CX" Series Coaxials are genuine 2-way with electrically and acoustically independent "woofer" and "tweeter". "H" Series uses direct radiator cone type "woofers" for a maximum of value at low cost; they have integral electrical crossovers. KTX-3 Step-Up Kit will later provide compression-driver highs above 2000 cps. "CX" Series is designed for ultimate coastal performance; they employ the expensive through-hole compression-driver "tweeter" for maximum 2-way system performance and low crossover frequency (2000 cps). Full L-C crossover network. KTX-1 Step-Up Kit may be added later for range extension to upper hearing limit.

COAXIAL 3-ELEMENT SYSTEMS

"CX" Series speakers are a combination of a compression driver super-tweeter and a 2-element direct-radiator woofer-mid-channel. Electrical crossover is at 4000 cycles. Small diffusion radiator disperses and balances radiation from 2000 to 4000 cps. Three terminals for easy wiring of KTX-3 Step-Up Kit for later conversion to full 3-way system with compression driver mid-channel. A "best buy" for performance intermediate between DUAX and "H" Series coaxials.

DUAX® 2-ELEMENT SYSTEMS

"DX" Series speakers have two carefully coordinated cones driven by a single voice coil. Both operate together up to a "mechanical crossover" at 4000 cps; the small H-F radiator is effective above 4000 cps. May be expanded to 2-way system with compression driver "tweeter" with KTX-2 Step-Up Kit.

UNAX® SINGLE ELEMENT LOUDSPEAKERS

A new high in single-cone single voice coil speakers with performance exceeding that of some speakers costing far more. Cone is specially designed as central motor radiates smoothly and efficiently at high frequencies. Viscous edge damping. KTX-2 Step-Up Kit may be added to make 2-way system.
