**How to Avoid
"on the job"
EYESTRAIN**

Are your eyes tired and achy after a day's work? If so, and you wear glasses, it's a safe bet that the correction provided by your lenses does not match your working pattern. If your sight reaches constantly from normal reading range to arm's length or beyond, eyestrain is inevitable when your glasses do not provide the proper corrections.

A WORKING AREA ANALYSIS OF YOUR JOB, made right here in our offices will provide the data needed to grind lenses that will relieve the strain that saps your energy and makes you feel below par at quitting time. Come in for a demonstration without the slightest obligation. Easy terms on all glasses.
