Huge Globe to Be Exhibited

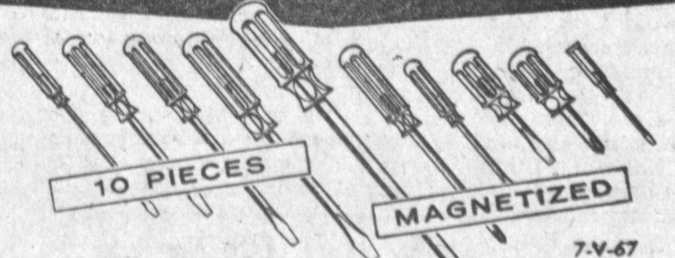

What is believed to be the largest rotating world globe will be one of the spectacular features of The National Supply Company's exhibit at the International Petroleum Exposition. The exposition will be held May 14-23, 1959, at Tulsa, Okla. Thirty feet in diameter, the globe will be positioned so that its highest point is about 70 feet above the ground, with its axis rising another 10 feet. Driven by an electric motor, the globe will turn on its axis at the rate

of two revolutions per minute, giving visitors an effect much as if they were looking at the world from outer space.

WHAT'S DOING

R. S. Pyle, your Telephone Manager in Torrance

Ever counted the steps from the kitchen to your phone? Try it. 15 steps? 20? 30? Even if you get only 3 calls a day during kitchen hours, a kitchen extension would save you 16,000 to 33,000 steps a year! It lets you go right ahead with your work when the phone rings, too. No turning off the stove and running through the house to answer the telephone. And if you're planning to move soon, you can save money on the installation cost of extensions. The charge to move your present phone covers the installation cost of all the extensions you'll need in your new home.

Traffic can be rough. And if you have business in, say, Long Beach, or an errand to run to San Fernando, chances are you'll be in a scene like the one shown above. A good way to avoid it is to make your trips by telephone. Traveling by phone saves time, trouble—and money. Pacific Telephone
