FELIX GREENE

Briton to Tell of China Under Communist Rule

A British-born businessman now residing in California will discuss Red China in the final presentation of the current El Camino College lecture series Monday night.

Tickets for the Felix Greene lecture are now on sale to the public in the college book store for \$1.25. Students and employees holding ticket books will be admitted without charge.

Subject of the lecture, to start in the Campus Theater at 8:15 p.m., will be "Inside Red China Today."

Green will give the first comprehensive eye-witness report of his tour of Communist China in his El Camino College appearance. The eye-opening account will describe how the Chinese people live, work and play.

A penetrating discussion of the changes which Communism has brought into the lives of the Chinese and what Americans may expect of the China as projected plans go forward will be featured. The speaker will analyze the successes and failures of the present Chinese regime and the role which the Russians are playing in the new developments of the country.
