### Name New Executives

Top ew assignments for two veteran Douglas Aircraft company employees were announced today by H. G. Hynd, vice president-general manager, El Segundo Division.  
W. L. Whittier of Rolling Hills has been named factory superintendent succeeding J. W. Roda, now on leave of absence, and W. E. Luff, chief, quality control, has been appointed to succeed Whittier as division manager of product reliability.

**MISSING**—Pokey, a 7-year-old Shepherd, has been gone from the home of Frank Correntino, 23113 Dana Ave., for past two weeks and is sorely missed. He is described as white, brown and black on back.

### Death Tax Opposed

A legislature joint resolution urging cities not to clamp on inheritance taxes locally, was referred to City Attorney Stanley Reimelmeier.  
The resolution points out that the State and Federal governments already tax bequests, and opposes similar levies by chartered cities. Torrance does not have such a tax.

**Makes all curves feel banked...**

**...the curve-hugging Wide-Track Pontiac!**

It's been a long time since the public took to an automobile with the verve and vigor of the current admiration for Pontiac. It's now first in sales in its price class. Sleek beauty is one reason. Wide-Track Wheel design is another. The wheels are five inches farther apart to increase stability on curves and corners. It's a very simple, basic innovation yet the improvement it makes in your control of the car is remarkable. You're more comfortable than you've ever been in narrow track cars.

**THE ONLY CAR WITH WIDE-TRACK WHEELS**  
Dotted lines show conventional wheel positions. Pontiac's wheels are five inches farther apart. This widens only the stance, not the car itself. Pontiac hugs tighter on curves and corners. Sway and lean are considerably reduced, ride is smoother, balanced, steadier.
