Most inexpensive, mass-produced watches today, have metal "pins" pivoting in metal "sockets" at all points of wear. We all know how fast "metal on metal" wears out! That's why these watches are so superior! Each one has a precision jeweled movement . . . with jewels of great hardness at all "friction points"! And for accuracy, each one also has a lifetime guaranteed mainspring . . . two great big reasons why these beauties are unequalled in beauty, accuracy, and VALUE!
