## EXPLAINS CAUSE OF BIFOCAL DISSATISFACTION

A noted eye specialist, writing in the "Journal of Living," claims that the nervousness and headaches suffered by some bifocal wearers are due to the fact that their glasses are not providing comfortable vision at intermediate distances—48 to 50 inches. What is needed, this specialist asserts, is comfortable vision at ALL ranges. Dr. J. M. Soss, optometrist in the Harbor Area for 32 years, concurs with this opinion and states that many of his patients who complained about bifocals are now enjoying greatly improved vision through the use of Continuous Vision Glasses. These advanced-type glasses, ground in the Soss laboratories, combine—in a single lens—corrections for near range, MIDDLE range, and far seeing distances. Those interested in testing the remarkable vision improvement offered by Continuous Vision Glasses may do so without obligation by visiting Dr. Soss' offices at 1268 Sartori Ave. Phone FA 8-6602. Open Friday evenings and all day Saturdays. —Adv.
