Explains Amazing Rise in Contact Lens Use

According to press reports, new-type contact lenses are taking the country by storm. Dr. J. M. Soss, optometrist at 1268 Sartori for 32 years, points out that this phenomenal surge in popularity is due to the fact that the public is realizing that perfect plastic contact lenses are a safe, economical method of correcting the vision of people in all walks of life. Because of their tiny size and almost weightless construction, modern "contacts" can be worn comfortably for as long as 16 hours at a stretch. Dr. Soss states that those who call at his 1268 Sartori Avenue offices can find out, without obligation, how easy it is to wear contact lenses. No appointment is necessary, and Dr. Soss' offices are open Friday evenings and all day Saturdays. Convenient terms. Phone FA 8-6602. Soss' offices are maintained also in Wilmington.

How 'Bout a Drag?

Ambulance Driver Faces Road Hog

"Everybody wants to race an ambulance," is the complaint of an ambulance driver of Goodhue service of Torrance, which answers an average of seven emergency calls daily.

The disgruntled driver added that he got some of his own medicine when, driving west on 190th St. after being called out on an emergency, a woman blew her horn at him, forcing him to stop, telling him to get out of her way as she crossed the intersection on a greenlight.

Another problem involved is the disinterested attitude of traffic as an ambulance passes. The driver mentioned that cars often times fail to pull over or even slow down as he appears.

Radios Distract

"However," he said, "I think the reason for this is the blasting radios which won't stand for outside interference."

The four member crew which serves 48 hours on duty and 24 off, reports a maximum of 20 calls once. Very rarely, the group mentioned, is there a day without a call.

Services of a radio system from the police department to the dispatcher and drivers, is an aid which is almost "invaluable," stated one of the attendants.

Dispatcher Checks

When the team receives a call from the police, the dispatcher checks the map and gives directions. "This way, we never get lost. The only way there is a mistake is if we are given a wrong address over the radio," mentioned the dispatcher.

Recently, the squad handled a call in 23 minutes. This accident involved four injured people, which made it necessary to use two ambulances, chemistry, geology, biology, mathematics, engineering, business, English, speed reading, electronics, printing, architecture, art, drafting, philosophy, speech, nursing, history and psychology.

Counselors will help students plan their programs during registration and will be available during the entire summer session.

A complete schedule of classes and a general catalogue may be obtained by calling at the college, 1111 Figueroa Place, Wilmington, or by telephoning TE 4-8581.

Harbor College Opens Summer Registration

Regular registration for the six-weeks summer session at Harbor College will be held Wednesday, and Thursday, from 8 a.m. to 2 p.m., and from 4 to 8 p.m., held July 5 and 6 during the same hours. But since classes begin Tuesday, July 5, it is advisable to register early. No individual appointments are necessary for summer session registration.

All courses are tuition-free carry regular college credit, and meet from 8 a.m. to 10 p.m. Mondays through Fridays. No admission tests or transcripts are required. Any high-school graduate or person 18 or older may attend.

Eighty courses are being offered in the eight divisions of the college. Among them are physics,

It took five minutes to arrive on the scene, five minutes to load the patients into the ambulances, five minutes to arrive at the hospital, and nine minutes to return home.

Service Price

Costs of the service are \$15 for the first mile from the scene of the accident to the hospital or any fraction within that mile, and \$12 per additional mile. Victims are billed for services, however, "the police usually end up paying for over half of the accidents," announced the attendant.

"When the fee is taken care of by the city, we receive only one half the fee charged to victims. This standard is set up by a county agency," the driver said.

Narbonne Ranch Water Company Project Begins

Work will be begun on the project of reconstruction of the Narbonne Ranch Water Company Number Two System as funds become available through the sale of bonds in order that the water shortage situation in that area be alleviated, Supervisor Burton W. Chase announced recently.

In that area, adjacent to the county water works district number 13, the residents were faced with shortages and denial of the issuance of new building permits because of an inadequate water system.

In a drastic effort to solve the serious water problem, the residents voted in January to annex the service area of the Narbonne Water Company to district Number 13.

At this election, the voters authorized the board of supervisors, governing body of the district, to sell up to \$600,000 in bonds for the purpose of the annexation and reconstruction.

State Employment Increases During May

A seasonal gain of 87,000 in California civilian employment in May and a smaller-than-usual drop of 18,000 in unemployment were reported today by state officials.

Director of Employment Irving H. Perluss stated that the number of unemployed declined from 323,000 in April to 305,000 in May. This was the smallest April-May decrease since the end of World War II. Continued heavy unemployment of aircraft workers, and also of construction workers despite the spring pickup in that industry, slowed the normal drop in unemployment.

The number of unemployed this May was above the year-ago figure by 71,000. The current figure has been exceeded in May only once in the past ten years—in 1958 when 368,000 were seeking work. The unemployed comprised 4.9% of the labor force this May, the same ratio that was reported for the nation. In April, the California ratio was 5.2%; in May, 1959, 3.9%; and in May, 1958, 6.2%.

Camino President Attends Seminar

President Stuart Marsee of El Camino College, was one of 20 presidents who attended the first Washington Seminar of College and University Presidents on "National Aspects of Higher Education," sponsored by the Association for Higher Education recently.

The seminar was made possible through a grant from the Danforth Foundation. President Marsee had been selected for this honor by a national committee of the AHE.

Especially designed to acquaint the relatively new college and university presidents with federal and private nationwide programs af-

fecting higher education, the seminar included sessions on national programs in science, proposed federal legislation, the effects of the National Defense Education Act, international educational programs, and research and statistics.

In addition, panels of experts discussed higher education and the press, the work of national associations and councils in the field of higher education, and goals and directions of American colleges and universities.

THE SPINET THAT IS A PLAYER-PIANO

PIANOLA

At Last!
the piano
the whole family
can play

"My teacher says the Pianola is helping me learn to play manually faster."

"Song words printed on the music rolls—great for parties... everybody plays and sings."

"So compact, so modern—gives our home that 'lived-in' magic look."

"Wait till you hear the 'Ukulele'—sounds like the playing of a sitar or mandolin."

"Now here's what I call 'active' relaxation. Makes me feel years younger playing all my old favorites."

THE SPINET THAT IS A PLAYER-PIANO: an exciting new player-piano with fingertip and pedal controls that let you play all your favorite songs—even if you've never had a lesson in your life!

AND THE PLAYER-PIANO THAT IS A SPINET: yes, the Pianola is also a manual spinet for standard play—a beautiful, ultra-compact spinet, rich in tone, responsive to the touch.

FOR MANUAL PLAY, the Pianola becomes a superb modern spinet, refreshingly clean in line.
