

Announce College Art to Be Displayed

Art productions by promising Harbor College students are now on display in the college administration building and library, Harold W. Jones, art chairman, said today.

The public is invited to view the showing any weekday from now until the end of January.

The exhibit includes watercolor and oil painting, design, life drawing, lettering and commercial art, perspective sketching, crafts, mosaic and other three-dimensional design, and colorful mobiles.

A special part of the show this year consists of architectural renderings, small home models, and other work by architecture students.

A feature of the painting display is the classification of all the work, with a price list of paintings for sale. Prices are considered very modest, Jones said.

Instructors whose classes contributed to the exhibit are Jarl Havlena, John Cassone, Laurel Baker, and Harold Jones.

Heart Information Given Lions Club By Dr. R. LeBow

Latest information on the problem of heart and circulatory diseases was presented to the Lions Club at their luncheon meeting last Tuesday, at the Palms Restaurant, 1925 W. Carson Blvd., in Torrance.

Dr. Robert C. LeBow, guest speaker and member of the Speakers Bureau of the Los Angeles County Heart Association, discussed how heart research in recent years has established some hopeful facts about heart and blood vessel diseases, the largest single cause of death in the United States.

The Speakers Bureau—one of the public education programs of the Heart Association, supplies speakers, films and literature on many subjects concerning the cardiovascular diseases. Contact the local Heart office at 124 South Locust Avenue in Inglewood or call OR 8-9907 for further information.

Can you guess her SECRET?

Now—so comfortable, so undetectable—contact lenses are for just about anybody: the self-conscious teen-ager, hating to admit she needs glasses... the society miss who feels that conventional glasses subtract from her youthful charm... the man or woman afflicted with forgetfulness who too often leaves their regular glasses at home. Whatever your reason for being interested, come in and see what Science has done about contact lenses to make them wonderful to wear.
