

## Best of American, Japanese High School Swimmers Will Compete at Aug. 18 Meet

Led by the New Trier Swim Club of Winnetka, Ill., America's record smashing crop of high school swimmers will go against established world record holders during the National AAU championships Aug. 18-19-20 at the Los Angeles Swim Stadium.

The youthful Americans will also meet the 12 high school champions of Japan, who are coming to Los Angeles with Japan's free style sensation Tsuyoshi Yamana-

Bill Lippman, Jr., general chairman of the three-day na-

tional water carnival, said today that the famed New Trier team likely will compete here intact. Competing last spring for New Trier high school, the team placed third in the National AAU indoor meet at New Haven, Conn., and is rated the greatest prep team in swimming history.

"Only four university teams in the country, Southern Cal, Michigan, Indiana and Yale can be rated ahead of New Trier high," said Lippman.

**RECORD HOLDER**

The Illinois team is headed by Fred Schmidt, holder of

the national high school 100-yard butterfly record of 52.7; Jack and Dale Kiefer, sons of Adolph Kiefer, 1936 Olympic backstroke champion; Dave Lyons and Roger Goettsche, Goettsche was the sensation of the national indoor championships in the backstroke, and is national 100 yard prep record holder at 54.8.

California's outstanding crop of prep phenoms, of course, will be in the nationals including sprint ace Steve Clark of the Santa Clara Swim Club, Roy Saari of El Segundo who defeated Yama-

naka in Toyko over the past weekend in the 1500 meters in 17:21.8; backstroke Bob Bennett of the Kris Kristensen Club, and many more.

Reserved seat tickets for the nationals may be obtained at the L.A. Swim Stadium, adjacent to the Coliseum, at meet headquarters, 300 W. Avenue 26, Los Angeles 31.

## Ryan Establishes Plant in Europe

Ryan Aeronautical Company has established a European office in Paris, France, it was disclosed today by G. W. Rutherford, vice president-operations. Located at 102 Champs Elysees, this facility is under the direction of Lt. Col. Alain C. Jourdan, who recently retired from the French Air Force.

Established originally as sales and engineering liaison headquarters for Ryan Electronics, the function of the Paris office has been expanded to include representation for Ryan Aerospace. The office also serves as European headquarters for the entire company.

The recent step-up in use

of American military equipment in NATO countries has increased the market potential for Ryan electronic navigation sets and for Ryan Firebee target missiles.

Ryan Electronics, one of the world's foremost producers of airborne Doppler navigation equipment for helicopters and fixed-wing aircraft, is presently working with military and industry people in a number of foreign countries.

Similarly, Ryan Aerospace representatives are working with several foreign governments regarding various applications of Ryan Firebee target missiles for their training operations.

**SASSY AND SIMPLE**—this perky little dress is designed by Sheperd for the make-believe set, with a minimum of detail to make the most of the Tyrolean stripe. A single band around the hem line is all that is needed to pick up the many-colored print. The Sanforized-Plus promise on the tag doesn't show, but it carries an important message of easy care: a whisk through the family washer, a flick of the iron, and it will hold that crispness and perfect fit. A Tydee print from ABC.

## Airline Offers Reduced Rate For Young Set

Acting to broaden the air travel market by making tickets on all flights, including jets, available to young passengers at sharply reduced rates, Western Air Lines today announced plans for a special "youth fare."

The plan calls for sale of air transportation at one-half regular first-class fares, exclusive of jet surcharge. All persons between the ages of 12 and 21, inclusive, will be eligible to purchase the bargain tickets.

With Civil Aeronautics Board approval, Western will make the "youth fare" program effective over its entire domestic system on August 31, according to Arthur F. Kelly, WAL vice president-sales.

"We believe this plan will expand our market by making low-cost air travel available to young people," Kelly said. "We know youth is air-minded and we want young people to experience regular, scheduled airline travel as early as possible."

Young servicemen and college students, particularly, can expect to benefit from the Western program, the WAL official predicted.

Youthful travelers purchasing the 50 percent reduced-rate tickets will be permitted to confirm reservations three hours before flight time.

## Spirit's Healing Power Stressed

"Not by night, nor by power, but by my spirit, saith the Lord of hosts." These words from Zechariah (4:6) are the Golden Text of the Sunday Lesson-Sermon on "Spirit" in all Christian Science churches. The spiritual foundation of divine healing will be emphasized in the sermon.

Matthew's Gospel relates how the Pharisees questioned Jesus, "Is it lawful to heal on the sabbath days? that they might accuse him." Jesus said, "What man shall there be among you, that shall have one sheep, and if it fall into a pit on the sabbath day, will he not lay hold on it, and lift it out? . . . Wherefore it is lawful to do well on the sabbath days." Then said he to the man with the withered hand, "Stretch forth thine hand. And he stretched it forth; and it was restored whole, like as the other." (12: 10-13)

In "Science and Health with Key to the Scriptures" Mary Baker Eddy describes the basis of Jesus' healing mission in these words, "Jesus was unselfish. His spirituality separated him from sensuousness, and caused the selfish materialist to hate him; but it was this spirituality which enabled Jesus to heal the sick, cast out evil, and raise the dead" (p. 51).

## Company Reports Increased Sales

Increased sales and a return to profitable operations highlighted Aeronca Manufacturing Corporation's six month earnings report made public today.

John Lawler, president, said Aeronca had reversed its "no profit" picture of 1960 with first half 1961 earnings, before taxes, amounting to \$466,128. This compares with a before tax loss of \$313,369 for the first half of 1960. According to Lawler, earnings per common share, after taxes and after provisions for preferred stock dividends averaged 36 cents, as compared with a loss of 31 cents in 1960. Total earnings after taxes totaled \$337,533 for 1961's first half, Lawler reported.

Sales at the end of six months were \$17,936,414, an increase of \$4,685,444 over the first half of 1960 sales of \$13,250,970. The last figure, however, includes sales of \$1,883,182 recorded during the period January 1 to March 24, 1960 by Buensod-Stacey, Inc., which Aeronca acquired by merger on the later date.

Commercial products accounted for approximately 40 percent of Aeronca's gross sales.

Included in this total are sales of Buensod-Stacey Corporation, a wholly owned subsidiary, which specialized in commercial and industrial air conditioning installation.

## Officer Warns About Danger Of Blowouts

The driver's natural reaction to apply the brakes in time of emergency can be a fatal mistake in case of a blowout, Capt. Errett L. Greer, commander of the California Highway Patrol's South Los Angeles Area, said.

"Forceful braking can send your car into a dangerous skid, or possibly a rollover, when a tire blows out. The safest procedure is to let the car slow down before you brake."

"If a tire blows, grip the wheel firmly, holding a straight, even course, until the vehicle slows to the point where you have absolute control. Then apply the brakes smoothly with moderate pressure."

Blowouts, though infrequent, tend to occur more often during summer months because of the added strain placed on tires by extreme heat, the captain said.
