## U.S.D.A. GRADE "A" California Grown TOM TURKEYS

16 to 20-lb. Average

Turkey for the weekend is the easiest way for you to spend those precious outdoor summer days with your family. No need to stuff bird, merely insert large peeled onion inside cavity, season, and dot with butter or margarine both inside and out. Wrap in aluminum foil and roast. Turkey will be tender and juicy and ready when you come home.

Fresh or Flash Frozen

29¢ lb.

HEN TURKEYS 10 TO 14 POUND AVERAGE 39¢ lb.

## U.S.D.A. Government Graded "CHOICE" LEG of LAMB

Another family favorite that's easy to prepare. With sharp knife, cut tiny hole, and insert whole clove of garlic. Salt, pepper, paprika and a touch of ginger. Roast until tender. Don't forget to serve with Mint Jelly.

SERIOUS CONSIDERATION is given to studies by representatives of eight nations, all students of a single El Camino College class. They are Miss Linea Nilleman, ASF student to Switzerland last fall and (left to right) Baldey S. Sekhom, India; Jimmie Wong, China, and Albert H. Emerson, former student of the Indian school at Shiprock, N. M. Berndt Lindberg, a native of Sweden, is also a student of the class.

## Camino Offers 'Extra' Study In Inter-Cultural Relations

When classes at El Camino College open Sept. 11, many students will experience firsthand lessons in inter-cultural relations as a supplement to regular classroom assignment.

While the great majority of Warrior students is composed of local residents, most of whom have graduated from local high schools, representatives of foreign lands and many of the 49 other states enrich cultural backgrounds of many classes.

During the summer session just completed, for example, an English class of 34 students included a visa student from India, natives of Sweden and China, an AFS student who returned from Switzerland last spring, and a full-blooded Indian, whose education was initiated at the age of 13 in the noted educational facility for Indians at Shiprock, New Mexico.

### HONOR STUDENT

Balder Sekhom, an honor student from Patista, India, entered El Camino on student visa in Sept. 1960 as a major in engineering. He plans to continue his work at UCLA before returning to his native land to establish his own business in the field of electronics.

Sekhom is eager to correct the "typical" American impressions of his country, wishing Americans to know of modern developments and innovations which refute the prevalent image of tigers, sacred bulls and passe systems 2000 years old which are popularized by moving pictures. He concedes that the Eastern part of the world is equally confused about American life. Sekhom hopes to clarify impressions on both sides of the world. While enrolled at El Camino he resides at 4114 Manhattan Beach Blvd., Lawndale.

### NATIVE

Jimmie Wong, 23, a native of Canton, China, rejoined members of his family in Inglewood after a family separation of 10 years during which time his father was in the US and he, his mother, and brother were in China. His father, a restaurant worker, is a citizen of the US, as are both sons. The mother is currently seeking citizenship.

An electronics major, Wong will work on completion of requirements for an Associates of Arts degree at ECC. The Wongs live at 8415 La Cienega, Inglewood.

Berndt Lindberg, 19-year-old son of Mr. and Mrs. Birger Lindberg, 1004 Prospect, Hermosa Beach, will return to Sweden on completion of his work on campus, where he has been an electronics major.

During the past eight months of his nine-year stay in the United States, he put his education to use in the television industry. He has been employed by KHJ-TV in the field of engineering, as a disc jockey, video technician, and assistant camera man. Among his assignments have been coverage of Pasadena's Tournament of Roses—his first—and baseball games at Wrigley Field.

### RETURN

On returning to Sweden, the youth will assist his grandparents on their farm in Northern Sweden before continuing his education in that country.

Miss Linea Hilemen, June graduate of North High

School, served as class valedictorian following her return from Switzerland, where she spent a semester as an American Field Service exchange student. She is the daughter of Mr. and Mrs. Jack C. Hileman. Hileman is an El Camino College science instructor. They live at 17026 Yukon Ave., Torrance.

"I was fortunate to have been placed in a German-speaking country," Miss Hileman said, "for my college major is German and other foreign languages." The coed corresponds with European friends in Germany, Switzerland, Holland, England and France and hopes to study in Germany on completion of her work at El Camino College.

### NAVAJO

Born on a Navajo Indian reservation, Albert H. Emerson was raised by his grandparents following the death of his father and mother. At 13, he started school at Shiprock Boarding School 40 miles from his home. "Although I was older than the others when I started school," he says, "I considered myself very fortunate to enter school as there were several hundred children waiting for a room at the hotel, which has an enrollment of about 80."

After spending several years in various Indian Schools, Emerson entered the US Marine Corps, later coming to Southern California, where he completed high school requirements in night school. He lives with his wife and small child at 722 E. 142nd Street, Hawthorne.

## Garrett Company Conducts Course At University

For the first time a course on "Thermal Management of Manned and Unmanned Spacecraft" will be conducted on the campus of UCLA by Dr. John L. Mason and Aaron Shaffer of The Garrett Corporation's Aircsearch Manufacturing Company, of which there is a branch here.

The course is designed for engineers and scientists in the aerospace industry who wish to explore the thermal aspects of space systems, subsystems and component design.

The short course will include nine guests lecturers from a wide spectrum of the aerospace industry. It will be conducted daily from 8 a.m. to 4:30 p.m., starting September 5 to 15.

Dr. Mason is chief engineer at Aircsearch. A graduate of the University of Chicago, he received a B.S. and M.S. and Ph.D. from the California Institute of Technology.

Aaron Shaffer is chief of advanced design for Aircsearch. He received a B.S. from Northeastern University and an M.S. from the Illinois Institute of Technology.

Anyone interested in joining the course should contact the University of California at Los Angeles, Engineering Extension.

### POOL IN FUTURE

Is there a swimming pool in your future? By 1970, according to Anaconda copper plumbing specialists, 2 million homeowners are expected to own their own "swimming holes." If you plan buying a pool, consider installing one that is heated, the specialists advise.
