## News Of Servicemen

Army Maj. Wilford E. Irish Jr., whose parents live at 20011 Mansel Ave., Torrance, is attending the 38-week regular course at The Command and General Staff College, Fort Leavenworth, Kan. Course began Aug. 25.

Course is designed to prepare selected officers for duty as commanders and general staff officers at division, corps and field army levels.

Included in Irish's class are 665 U. S. officers from the active Army, Army Reserve and National Guard, Navy, Air Force and Marine Corps, in addition to 85 officers from 48 allied nations.

The attendance of Army Reserve and National Guard personnel, who are on temporary active duty to attend the course, is indicative of the Army's effort to train and maintain "One Army."

The college, the Army's senior tactical school, was established in 1881 as the School of Application of Infantry and Cavalry.

Irish, a member of Sigma Phi Epsilon fraternity, was

graduated from Niagara University in Niagara Falls, N.Y., in 1949 and from Stetson University in De Land, Fla., in 1961.

Serving aboard the attack cargo ship USS Tulare, operating in the Western Pacific, is Richard T. Cabella, fireman, USN, son of Mr. and Mrs. Alfred W. Cabella of 1608 W. 226th St., Torrance.

The ship recently participated in "Operation Sharp-edge," a joint Seventh Fleet, Eighth Army, and Republic of Korea Air Force and Army amphibious exercise, held at Pohang, Korea.

Serving with the Third Marine Aircraft Wing at the El Toro Marine Corps Air Station, Santa Ana, is Marine Cpl. Robert R. Felix, son of Mr. and Mrs. Oscar R. Felix of 2273 Del Amo Blvd., Torrance.

Helicopters, transports and jets of the wing provide air support for infantrymen of the First Marine Division at nearby Camp Pendleton.

## Medical Speech Offered To Civic Organizations

Robert R. Wallace of 917 Cranbrook Avenue, Torrance, will be presenting a 20-minute talk called "The Medical Revolution" to interested civic and professional groups as a hospital research associate of CIBA Pharmaceutical Products, Inc.

He is part of CIBA's nationwide speaker's bureau, one of 60 men who just completed an intensive course in speech training. Wallace has been with CIBA since 1953. He is a graduate of UCLA.

Besides discussing the benefits of drugs and the savings in total medical care costs, "The Medical Revolution" predicts that cures for cancer and heart disease will be "only a fraction of the medical victories" reached by the year 2000.

CIBA speakers will be available in most parts of the country for speaking engagements to interested community groups.

## Wyle Laboratory Develops Wedge As Propellant

Wyle Laboratories has designed and developed a new high-accuracy dynamic flow sampling wedge for use in ground support propellant loading systems.

The wedge also has a wide commercial and industrial applications in such diverse industries as refineries, distilleries, and dairies, Lee N. Mortenson, manager, research and analysis department, said.

Accuracies to within 2.5 per cent in the prediction of mainstream contaminant levels, over extreme density variations, are provided by the new wedge, he said.

The sampler is designed so that its unique high-accuracy performance extends to sampling of high-pressure flows, Mortenson emphasized. The flow sampling wedge can be used with any liquid, gas, or combination, and under virtually any conditions of flow, temperature, and pressure.

The possibility of errors due to settling is eliminated by collection a "slice" specimen of fluid covering the full vertical cross section of the stream.

Wyle Laboratories designed and developed the dynamic sampling wedge in support of a propellant loading system filter evacuation program conducted for Air Force Ballistic Systems Division. Wyle has filed a patent application on the new wedge.

## Departing Sept. 2, from

Camp Pendleton, with the First Battalion, Seventh Marines, for a 12-month tour with the Third Marine Division on Okinawa, were Mr. and Mrs. M. E. Corbin of 22010 Reynolds, and Pfc. John A. Russak, son of Mr. and Mrs. Stephen C. Russak of 1604 W. 22nd st., both of Torrance.

The battalion left San Diego, aboard the transport USS General W. A. Mann.

## Gilkison Named Systems Head

Space Technology Laboratories, Inc., has announced the appointment of Charles A. Gilkison, of Rolling Hills, as head of the newly-created Digital System Section in the Electromechanical Laboratory. STL is a subsidiary of Thompson Ramo Woolridge Inc.

The new section will be responsible for project digital design support, systems analysis, simulation studies and design of automatic and semi-automatic checkout systems.

Gilkison, who until recently was with Hughes Aircraft Company in Fullerton, is a graduate of the University of Texas where in 1951 he received his B. S. degree in Physics and B. A. degree in Mathematics.

He is a member of the Institute of Radio Engineers and the Association for Computing Machinery.

Gilkison is married, the father of three children, and resides at 4932 North Marlowa, Rolling Hills.

## Stamp Collectors Sponsor Auction

At the last meeting of the Torrance Stamp Club, the committee in charge of auction opened the fall season of the club with a distribution of stamps from Norway and the British Colonies.

The club will meet Monday, Sept. 25, at 7:30 p.m., in the Community Building at Scott Park, 23410 Catskill Ave., Wilmington.

All stamp collectors are invited to attend this meeting and take part in the general auction that has been planned for this evening. For further information call TE 4-0368.

## New Location

Femco Division of Harvill Corp. moved its aircraft hinge operations into its new 30,000 sq. ft. plant at Susana Rd. and Reyes Ave. Sept. 15.

Company president J. W. Tuthill said that Femco's expanding production, presently requiring three-shift operations in its 10,000 sq. ft. plant in Redondo Beach, necessitated the move.

**MORE OPTICAL CARE  
FOR OLD AGE PENSIONERS**
