Cool, Airy Wool Sets Fashion Trend for Spring

Cool and airy is the theme of woollens for spring—cool touch, cool colors, airy lightness, airy textures—and how exciting they are.

Never have they been so light, so intricately and so beautifully designed.

This trend to light, meshy, near-gossamer weaves has grown and spread over the past few seasons into every category and almost every mill. The skill and imagination represented in the new collections evokes pride and praise.

Textures and surface interest are of paramount importance, sometimes boldly expressed, again delicate and restrained but none the less significant. Effects are achieved in many ways—fancy twist and reverse twist yarns, crepe, uneven, thick and thin yarns, combinations of various types.

Floats, nubs from the finest to big puffs, many sizes and shapes in clubs, various frostings, add their share to the dimensional, very interesting look.

Worsted wools assume a still stronger role; mohair is back again in loops, curls, brushed, clipped; reindeer hair, softened, makes a limited return; various touches of silk, linen and the like are used for accent.
