

Reveal Sale of 229 Homes In Grandview Development

In a New Year report, Grandview Palos Verdes has revealed the sale of 229 homes at its various peninsula communities since July

C. Kulow, director of sales, said 29 dwellings sold in December, traditionally a "slow month," constituted the most active December in the firm's history.

OFF TO JAPAN

Two members of the Los Angeles Angels are going to Japan to participate in Charlie Berry's baseball clinics for the servicemen stationed there. Outfielder Ken Hunt and righthander Eli Grba, in-and-out-of-season roommates, are joining Kansas City shortstop Dick Howser and A's catcher Haywood Sullivan in the tour from Jan. 20 through Feb. 6. American League umpire Berry is in charge of the unit, which is being sponsored by the Recreation Division of the Army.

The year-end spurt was attributed largely to the opening of The Estates, a 152-home development featuring monthly payments from \$142, and priced from \$25,000.

Located south of the city of Palos Verdes Estates, with many ocean views, The Estates offers three plans with inside space from 1,432 to 1,816 sq. ft.

Included in all homes are wall-to-wall carpeting in living room, dining room, entry hall, hallways and master bedroom, wood burning fireplaces with log lighters, two luxurious baths, attach-

ed double garage, utility room connecting to kitchen and garage, and built-in gas ranges and ovens. Two of the three plans provide a dishwasher as well.

Homes are near two elementary schools, the Peninsula Shopping Center, and the forthcoming Los Verdes Golf Course, cleared for 1962 construction by Los Angeles County. The new Palos Verdes High School is a few minutes by bus.

Designed by Harris & Rice, AIA, with a choice of 12 exterior stylings, Estates homes contain three or four bedrooms, family or dining room.

Furnished model homes may be visited by driving Crenshaw Blvd. to Silver Spur Rd. and turning right.

Grandview is also offering recently completed homes in its Country Club Unit for immediate possession. Priced from \$29,535, homes including split levels provide up to 2,127 sq. ft. of interior space.

EARLY PRINTING

The earliest known form of printing was accomplished by means of signet stones. Used in antiquity, apparently as substitutes for signatures and also as religious symbols, the devices consisted of a stone with a design cut or scratched upon the surface. The stone, often set in a ring, was dabbed with pigment or mud and pressed against a smooth, resilient surface.
